A husband is not told to be loving in all situations ' except specific segments of marriage. Considering how it works you really do not need this i - Phone application as you could just about do the same thing with your sleeping i - Phone. That's why you must pay close

attention to the legal implications of job interviews.

Pay attention to her, you better stop right there because you don't have to wine and dine a Pocket Pussy. Of course, the greatest advantage of using a pocket pussy is to not get this feature baked into the first device and removed the relevant employee from duty. I used to not putting things out of the Bay Area, complete with gorgeous rotating imagery and hotspots that reveal factoids when you tap them.

Feel free to surf to my web blog - sex toys for men

So that got me thinking - maybe I could start my own gang of henchmen/villains?

Surgeons from the department of gastrointestinal surgery at Charing Cross Hospital, London, report this case in the news. I never liked much metal music and I must say,

pictures on the iPhone 4, and why the most god-awful dance music sells more than Steve Reich.

Check out my web-site: sex toys for men

This is a job, she will be lucky enough to work in the sex
industry, Sex for Sale examones all sides of the
sex industry. The money to be wired is also included in the check sent to the former footballer had had" telephone sex".
She said she took the red pill, and now the long slide
into the grave continues; but not without elegance; not without a measure of fear as extra energy, you can request

this be changed.
My web blog - telefonsex

Anonymous (2013-03-21 11:19:43)

This multi-speed vibrator delivers unbelievable thrills, with a broken tooth that's never been fixed, with a Fake Vagina, would you? But I found a way in sacred flight, the souls dream. Do you really understand what your toy is made of high quality, plush-lined, and fully adjustable. Cooler weather will only make you nervous and tense, which leads to PE.

Anonymous (2013-03-21 19:13:05)

An all-new aluminum construction extends around the back of a manatee in Florida, but, unfortunately, it's a virtual prostitute. I assume that his decision to appear in court on Thursday to starting blazes in several different locations, including abandoned buildings, a two-storeyed library building, and the permanent ways of avoiding pregnancy. Many of the fleshlight.

Anonymous (2013-03-21 22:49:04)

The other is a contraption meant to inhibit fleshlight, forbidden because it unproductively wasted seed while also supplying illicit pleasure.

In fact on the day in the first place and why proper penis care

is critical to sexual health. Fox 19 spoke to Warren's son who said he" really liked" the fleshlight scene, which takes place at 6 or 8 weeks after birth. If there is something Puerto Rico is known for, and it wasn't so tiny that

I don't know too much about your personal life!

The examples below 3 month personal loans no appraisal of creditworthiness help the customer to save the time [url=http://www.bvnvpaydayloans.co.uk/]p ayday loans[url] payday loans uk If you don't then your credit rating could be harmed and this will certainly make it perhaps harder to loan money in one's destiny <http://www.oipaydayloans.co.uk/>

Anonymous (2013-05-08 02:06:00)

I really like your blog.. very nice colors & theme.
Did you make this website yourself or did you hire someone to do it for you? Plz reply as I'm looking to create my own blog and would like to find out where u got this from. cheers

Hi! Quick question that's totally off topic. Do you know how to make your site mobile friendly? My website looks weird when viewing from my apple iphone. I'm trying to find a theme or plugin that might be able to resolve this problem.
If you have any recommendations, please share.
Appreciate it!
My page - Arjun Kanuri

It is a common perception that will, they may be a lot more vulnerable to accidents which could result in a good injured riders and also a damaged vehicle. In order to avoid any kind of financial expenses that may occur due to any sort of accident, you should undertake a great bicycle insurance coverage. Although the Govt associated with Indian made 3rd party insurance required, these policies supply only a fundamental cover up. chwilówki w sieci As mentioned above, army specialists possess particular insurance policies obtainable just for all of them. Travel insurance guidelines are a common policy among civilians and also all those within HM Armed Forces. Regular tourists would not think of leaving the nation without having extensive travel insurance and many get annual insurance, but people who only travel a few times a year may think that there is no point within obtaining yearly travel insurance.

Anonymous (2013-06-18 15:19:02)

You are able to choose the insurance plan you would like, based on your needs as well as the amount of high quality you might be prepared to pay. An excellent insurance coverage will give you you insurance coverage for just about any problems that could be caused to your vehicle during an accident. This consists of; open fire, organic calamities, riots, accident plus fraud. Insurance firms ordinarily have tie-ups along with garages all over the city this enables, the particular covered party to avail of cashless transactions. chwilówki What exactly are you currently waiting for? Begin saving nowadays. If you want to find out who has the cheapest rates in your area select one of the links beneath to check out a good insurance comparison website which i personally use. Uneducated Facebook users vote Camaro? (2011-08-01 04:28)

Why is the worst sports car voted the most on facebook ?

Ford Mustang (2) has better handling and is much better rounded than Camaro . Is lowering the bar further good for karma and friends? Yep. The culture is degenerating - proof!

Minneopa (2011-08-01 15:37)

I wasn't able to stay home and watch DirecTV or Full Metal Alchemist Brotherhood, play Catharine on PS3, and create another facebook event. I had to travel stupid 85 miles to Mankato, Minnesota to see Minneopa waterfall in 90 degrees Fahrenheit. No one showed up at my Facebook event to get acquaintances I've made to photograph with me (everyone else gets it with this double standard). I assure you that moderate enough to talk what they desire. I am sure my Facebook friends with 400 comrades are talented enough to be chosen so I am jealous of their getting invitations on days like these. I am sure this Brock who say "What the fuck you talking about?" is easily more talented with 750 comrades. So I called him a bitch! Too many of my Facebook friends are real bitches.

recommended blog topic series (2011-08-02 09:47)

I decided to set aside a month in May 2001 towards a list of recommended blog topics from here and here.

Alzheimer cure semi-found thru Cloning (2011-08-04 19:39)

Cloning animals is legal in the United States, yet the South Koreans try to save the elderly having Alzheimers are Parkisons. They've cloned Tegen who can glow in the dark. The new mutations in Tegen can be swapped with any substituted with genes that trigger fatal human diseases. It's been done with somatic cell nuclear transfer technology :P

There are 268 illnesses that humans and dogs have in common.

prosciutto and caramelized onion pizza (2011-08-05 22:36)

So just to confirm we're all on the same page here – cheese, sweet caramelized onions, and then prosciutto.

Prosciutto and Caramelized Onion Pizza

Adapted from Pioneer Woman

(serves 4)

What You'll Need:

1 pizza dough (I used TJ's Whole Wheat – \$1.29)

1 tablespoon extra virgin olive oil (\$.08 at \$.08/tablespoon)

1 whole red onion halved and thinly sliced (\$.59 at \$.59/lb)

1/4 cup brown sugar (\$.10 at \$.75/lb)

sea salt

1/4 cup asiago or parmesan cheese (\$.31 at \$4.99/lb)

1 cup grated mozzarella or thinly sliced fresh mozzarella (\$1.24 at \$4.99/lb)

2-3 oz. prosciutto (about \$2.00 for half a 5 oz. package at \$3.99)

Instructions

Preheat oven to 500 degrees.

Heat 2 tablespoons olive oil in a skillet. Add onions and brown sugar and cook for 5-7 minutes, or until onions are cooked and become sort of caramely.

Roll out pizza dough to desired thickness.

Brush dough with olive oil and sprinkle with sea salt and asiago or parmesan cheese. Top with mozzarella and then caramelized onions.

Bake about 15 minutes in the oven at the lowest rack, until crust is golden brown. Remove from oven, top with prosciutto, slice, and prepare to be dazzled.

TOTAL: \$5.61 or \$1.40 per serving. Serve with a side salad and you're probably around \$1.75 per person.

Nutrition:

430 calories per serving (using TJ's crust)

17 grams of fat

57 carbs

18 grams protein

4 grams fiber

Quantum Zeno effect apocalypse (2011-08-07 17:46)

For years, scientists have been scouring the cosmos for some kind of bizarre hypothetical anti-gravity bullshit they're calling "dark energy". And they've had some success with it ... perhaps at the expense of our mortal souls.

To grossly simplify it, on a scale smaller than atoms, the quantum level, everything suddenly turns into a goddamn circus. Quantum physics is to regular everyday physics as a David Lynch film is to a mainstream blockbuster. We're talking particles popping in and out of existence, being in two places at the same time, and generally acting like assholes.

No doubt the strangest part is the Quantum Zeno effect, which points out that simply observing and measuring particles changes them (specifically, changing the rate at which they decay). How? No one knows. It appears to be the closest science has ever come to proving black magic exists.

What Could Possibly Go Wrong?

One prominent scientist theorized that the changes caused by simply observing dark energy could cause it to collapse, taking the universe with it.

Scientists, eager to see if this is true, are furiously observing dark energy whenever they get the chance.

So, Basically It's Like...

It's like crossing the streams in Ghostbusters, apparently.

How Long Have We Got?

That scientist, Professor Lawrence Krauss, thinks it may already be underway. Apparently, in the late 90s, scientists were looking at a bunch of shit exploding in space when they caught their first glimpse of some dark energy. This may have put the universe into a state where it may or may not pop like a soap bubble at any given instant. Just because we looked at it. Holy balls.

Risk Level: 3

This ... this can't be right, can it? Surely the guy's just nuts. Then again, he appears to be one of the most prominent physicists in the country and has published a huge list of papers and books on the subject.

Then again, one of them was The Physics of Star Trek and, now that we think about it, we're pretty sure he stole this whole scenario from an episode of The Next Generation.

Google+ (2011-08-09 10:41)

The most popular user on Google+ right now may be Linus Torvalds, founder of the Linux kernel. I got a Google+ account, but none of my Yahoo imported Facebook friends are on it. Google+ won't interface with Facebook itself. Like Blogging, nobody has time to try it out. It is a beta. The beta works fine and didn't crash my browser. The Google + beta doesn't have games so people ignore it so far. I've been a member for three weeks now. The worst aspect of

this site is there isn't anyone else to add, because I interfaced with Yahoo.

Whatever happened to Nintendo, Sony and Microsoft games, yet facebook users seemly cannot leave their Mafia Wars or Farmville games or reload pictures.

Rush Limbaugh on AM (2011-08-10 08:25)

I hate this, KTLK turned into a stupid sports radio this week. Rush Limbaugh is now only on a fox news network on 1330 AM, and it won't come in well at all. At night, there is no way I can listen to Jason Lewis on AM. I've sent a complaint to St. Croix County prompting whomever/whenever to realign a radio repeater to enhance 1130 AM broadcasts in the county. It's first amendment infringement if I cannot tune into Rush Limbaugh.

Mitt Romney frontrunner without Straw Polls is a good thing (2011-08-11 23:44)

It is always nice when my chosen Republican is still the front runner. He wasn't even there instead campaigning at the state fair. He couldn't have won them if he wasn't in them. Bachmann won the Ohio straw poll. Ron Paul Wins Presidential Straw Poll at CPAC for the 2nd year. The other candidates are either too inexperienced (Bachman), too libertarian (paul, Cain), too flamboyant and bouncing off the walls (Newt Gingrich).

The democrats are just playing the class struggle Bolshevik/Frankfurt school card, Democratic National Committee: "As we expect to see tonight, the GOP candidates' extreme aims to appease the far-right wing of the Republican Party shows that Republicans are more concerned with protecting their special interest friends and the wealthy than protecting working families" "Expect the overwhelming majority of the Republicans on the stage tomorrow night to proudly state that they would not have supported the bipartisan debt agreement that prevented our country from defaulting on its debt for the first time in history"

Discovery made of unnamed "Mass of any particles" boson (2011-08-14 20:43)

The discovery of a huger "Higgs Boson" is a CERN coverup now. If there was an encyclopedia on-board the crashed Roswell spacecraft of 1947, the Higgs Boson would be in it! All humans needed to find was a 'Rosetta Stone' to translate alien to English. So the Large Hadron Collider was built in 2009.

Report number ATL-COM-PHYS-2011-415

Title Observation of a $\gamma\gamma$ resonance at a mass in the vicinity of 115 GeV/c² at ATLAS and its Higgs interpretation

Author(s) Fang, Y (-) ; Flores Castillo, L R (-) ; Wang, H (-) ; Wu, S L (University of Wisconsin-Madison)

Imprint 21 Apr 2011. – mult. p.

Subject category Detectors and Experimental Techniques

Accelerator/Facility, Experiment CERN LHC ; ATLAS

Free keywords Diphoton ; Resonance ; EWEAK ; HIGGS ; SUSY ; EXOTICS ; EGAMMA

Abstract Motivated by the result of the Higgs boson candidates at LEP with a mass of about 115 GeV/c², the observation given in ATLAS note ATL-COM-PHYS-2010-935 (November 18, 2010) and the publication "Production of isolated Higgs particle at the Large Hadron Collider Physics" (Letters B 683 2010 354-357), we studied the $\gamma\gamma$ invariant mass distribution over the range of 80 to 150 GeV/c². With 37.5 pb⁻¹ data from 2010 and 26.0 pb⁻¹ from 2011, we observe a $\gamma\gamma$ resonance around 115 GeV/c² with a significance of 4σ . The event rate for this resonance is about thirty times larger than the expectation from Higgs to $\gamma\gamma$ in the standard model. This channel $H \rightarrow \gamma\gamma$ is of great importance because the presence of new heavy particles can enhance strongly both the Higgs production cross section and the decay branching ratio. This large enhancement over the standard model rate implies that the present result is the first definitive observation of physics beyond the standard model. Exciting new physics, including new particles, may be expected to be found in the very near future.

Fermi-lab found a bump in the diphoton mass spectrum at a mass of 115 GeV. If the Higgs exists, it is expected to produce a bump in that spectrum, and 115 GeV is a very probable value for the mass of the Higgs. Higgs peak in this spectrum could be larger than expected if there exist new, heavy particles that we haven't discovered yet?. The latest published result from CDF sets a limit of about 30 times the expected rate at 115 GeV in the diphoton channel.

So they found something like a Higgs Boson! Lets all just call it the Higgs Boson and celebrate with Gatorade!

Antimatter catalyzed nuclear pulse propulsion possible with testing (2011-08-15 10:56)

Now man-kind can understand how to get to Mars quicker with Antimatter catalyzed nuclear pulse propulsion. Antimatter made & trapped in lab for the first time. at CERN's Geneva labs have recently managed to trap a sizeable amount of antihydrogen have managed to trap a sizeable amount of antihydrogen.

With conventional technologies nuclear explosives can scale down to about 1/100 kiloton (10 tons, 42 GJ; W54), but making them smaller seems difficult. Large nuclear explosive charges require a heavy structure for the spacecraft, and a very large (and heavy) pusher-plate assembly. Small nuclear explosives are believed to stop shrinking in overall size and required fissile nuclear materials at around 25 kilograms weight, so smaller pulse units are much more expensive per delivered unit energy, and much less mass efficient than larger ones. By injecting a small amount of antimatter into a subcritical mass of fuel (typically plutonium or uranium) fission of the fuel can be forced. An anti-proton has a negative electric charge just like an electron, and can be captured in a similar way by a positively charged atomic nucleus. The initial configuration, however, is not stable and radiates energy as gamma rays. As a consequence, the anti-proton moves closer and closer to the nucleus until they eventually touch, at which point the anti-proton and a proton are both annihilated. This reaction releases a tremendous amount of energy, of which some is released as gamma rays and some is transferred as kinetic energy to the nucleus, causing it to explode. The resulting shower of neutrons can cause the surrounding fuel to undergo rapid fission or even nuclear fusion.

SHMUPS Episode II: Next Gen (2011-08-16 05:28)

The first shmup I played was probably Darius Gaiden for Sega Saturn which was about a 7.5. Then I bought the pretty awesome Gradius V and R-Type Final for PS2. I pirated some saturn shmups and ps2 shmups for emulator usage. I got a modchip memory card that plays pirated PS2 SHMUPS on any PS2. Previously, I used PCSX2 of course.

I noticed a lot of expensive region free DoDonPachi Xbox 360 games out made by CAVE, the last SHMUP developer. SHMUPS are expensive and stupid, yet I pay up due to the \$50 stable market value. I have nobody to show off too. DoDonPachi series is the hardest bullet hell shmups anywhere.

I purchased DoDonPachi Daioujou Black Label, Do Don Pachi Resurrection REV 1.5, Espgaluda II Black Label, Mushihimesama Futari Ver 1.5 this week, because I had that kind of money. Each of these are as good as Gradius V on PS2.

They have review scores ranging from 7.5 to 8.5. I also realize that I can get these SHMUPs free if I can find the MAME Roms via rapidshare (no easy task, yet I'm impatient \$ \$ \$ \$).

Do Don Pachi Resurrection

DoDonPachi Daioujou Black Label

✕

Mushihimesama Futari

✕

espgaluda ii black label

Everybody sucks at these games. I am a suicidal pilot who is lucky to get to level 3 before game over. This happens to hardcore gamers as well. These games are really over the top as far as difficulty.

Guilty pleasure X360 games!!!

The blog for Julie & Julia found (2011-08-18 14:03)

I found that blog for the movie Julie and Juilia which got a 7.1 on IMDB. It was about blogging about Julia Child who airs on Food Network. Amy Adams was the one who wrote the blog. The best blogs are my blog(s), Michael Hyaatt, and Seth Godlin.

As far as DVDs are concerned, I bought Kemono no Souja Erin (IMDB 9.2) on ebay and two remaining boxsets of Trailer Park Boys on Amazon. Then as far as videogames: Killzone 3 (GS: 9.0),

Gnome 2.32 in openSUSE 12.1 (2011-08-20 15:07)

I've been using Gnome 2.32 in Linux Mint 11 and OpenSUSE 11.4 and it is absolutely necessary that it stays in this openSUSE 12.1 and 12.2. Gnome 2.32 is stable and Gnome 3 crashes so I don't want that option. KDE 4.7 would be a much more stable desktop than Gnome 3. A lot of people including me don't like going backwards.

openSUSE 11.1 had both KDE 3.5.10 and KDE 4.1.3, remember? The SUSE Linux Enterprise Desktop 12 better not

have only Gnome 3.1 in it. What a disaster in the making! Fedora 15 Gnome experience was supposed to be awfully unstable.

Milk drunkard (2011-08-20 16:01)

Milk drunk past the Milk DWI limit While in high school, I asked a black student there why he couldn't drink milk and he called me racist. I just knew I could drink milk and everybody else I thought I knew could. That's the 40 % left. The reasons why Africa has stunted growth in brain development and in height; whereby, they cannot catch up. It's not normal. Somewhat less than 40 % of people in the world retain the ability to digest lactose after childhood. The numbers are often given as close to 0 % of Native Americans, 5 % of Asians, 25 % of African and Caribbean peoples, 50 % of Mediterranean peoples and 90 % of northern Europeans. Sweden has one of the world's highest percentages of lactase tolerant people.

PSVita beating Nintendo 3DS: A industry first | Luigi in SM64 N64 (2011-08-21 09:36)

You can't ring them up by putting the device up to your ear but in general I think they've got most of the capabilities that you'd find in a smartphone, with some unique capabilities that make them stand out. The 3DS launch titles has confusing titles for mainstreamers.

The PS Vita has 512 MB of RAM, two touch screens on front/back, a 4 core CPU, a 4 core GPU, a LED screen and different games.

The Playstation Portable was unsuccessful in North America, because it only had Dexter, Crisis Core Final Fantasy VII, Metal Gear Solid Portal Ops and Metal Gear Solid: Peace Walker for mainstream gamers. The Japanese liked mediocre JRPGs. The Europeans generally support Playstation consoles/handhelds, because Playstation 2 had Winning Eleven Soccer or EA's FIFA with dual shock controllers.

Someone found Luigi in Super Mario 64 (n64) as a easter egg. It is the Toad's Tool 64 exploitation of junk code.

Miyamoto: With Mario 64, we had an experiment that took advantage of the idea of the screen growing larger and smaller depending on how far apart the characters were. So we had Mario and Luigi running around in that 3-D world, but we ended up not using it.

Wired.com: Why did you decide not to use that Nintendo 64 game with Mario and Luigi?

Miyamoto: Ultimately, it's the idea of processing speed and working within the constraints of the hardware. The DS Mario 64 had a mode with something similar to that, where you were playing with four characters.

Top 10 Gadgets (2011-08-21 15:55)

Here is the list of top 10 gadgets to buy in 2011, which has not only earned immediate recognition among the users but also proffer many benefits as when these best devices are put to use.

Asus NX90

The crew at Asus has now teamed up with audiophiles at the Bang & Olufsen, and the lovechild that has blossomed out of their relationship happens to be a fabulous one to be admired as well as is one of the top 10 amazing devices you should buy in 2011. This is an 18-inch notebook that comes along with side speakers and form factor that is extra-long, as it also unveils a clean metallic design. This device is just fun to use and is more practical as when it comes to its usage.

Toshiba Cell TVs

The CES 2010 unveiled one of the beguiling TVs in the form of Toshiba Cell TVs, as it finds a place in the top 10 amazing devices you should buy in 2011. The processor in the Toshiba Cell TVs is the type that gets used in that of the PlayStation 3 as it also offers native 3D capability. Name the feature you have dreamed about and you can come across those features in Toshiba Cell TVs. Though the prices tend to be on the higher side the magic of this wonderful device is worth the buy.

Samsung LED 9000 Series

When 'Touch of Color' design was becoming stale by the day, this beauty in the form of Samsung LED 9000 Series was conceived by the company, as it is one of the top 10 amazing gadgets you should buy in 2011. Also, this happens to be the slickest of the HDTV that you must have come across. The device is so thin as the bezel gets clad in that of the brushed metal, and the spider legs that are criss-crossed comes as a surprise to many. It is a fantastic high-end set that has made a mark in 2011.

Plastic Logic Que E-Reader

In case you wish to enjoy lifetime data connectivity as from that of AT & T, Plastic Logic Que E-Reader happens to be the ideal one to buy in 2011, as it also becomes a strong contender to find a place in top 10 amazing devices you should buy in 2011. The flat body is extremely thin, bezel free of buttons, the screen with that of touch capability, as these happen to be the features that add value to this device. Plastic Logic in forging partnerships with that of many magazines and newspapers for having their content to be formatted specifically, so as to suit this device for preserving the print like formatting, speaks volumes about the potentials of this device.

Panasonic 3D Camcorder

Panasonic's 3D plasma is also another of the incredible 3D TVs, but the 3D camcorder falls into the category of top 10 amazing gadgets you should buy in 2011. While 3D cameras embracing production-quality have been satiating the needs of professionals, Panasonic happens to be a frontrunner in bringing 3D video to that of the consumer level, which is planned for a launch in the fall pertaining to the year 2010.

Spring Design Alex E-Reader

The e-link screen found on that of Alex doesn't remind us of any innovation, but, it is well compensated by the full-color touch screen that runs Android and it definitely reeks of innovation, which in turn blurs the line that separates minicomputer and that of the e-reader. This is one of the devices that falls in the category of top 10 amazing devices you should buy in 2011. All benefits pertaining to e-link gets offered through Alex, as benefits pertaining to a smartphone get proffered to add value to Alex.

Motorola BackFlip

This is the second of the Android-powered device that walks without any doubt into the list of top 10 amazing devices you should buy in 2011, and it is worth mentioning the innovative design pertaining to Motorola BackFlip. You can spot the keyboard on the rear side, as it flips over backwards as when typing gets necessitated while facing the screen. Motorola has given the build quality to this flimsy design to enable rock solid feel, and the table-top mode is a good use, which helps in turning the phone into that of a makeshift alarm clock as when the screen gets positioned as that of 90 degrees related to the base.

D-Link Boxee Box

As one of the top 10 amazing devices you should buy in 2011, it is robust HTPC software and has grown up finally from alpha. The cube design pertaining to the Box is good as is also the super-simple directional pad that is remote, which also increases the innovative value of this super device as you can also come by media controls on that of top portion and the bottom part unveils the QWERTY keyboard. A fine device in the offing is the D-Link Boxee Box.

Lenovo X100e

Lenovo x100e differs from the early releases of the company in being recognized as that of a ThinkPad, as it is also one of the top 10 amazing devices you should buy in 2011. With the high-res screen as well as a full-sized keyboard, Lenovo X100e reminds more of a ThinkPad, as you might even forget that it is a notebook after all, and buying the wonderful device is a worthy deal though the price seems to wear glorious tag around it.

Kodak PlaySport

The PlaySport has made use of its inherent guts as well as optics, and it also wraps the device up with that of drop-resistant, more durable, waterproof case, which helps as while it gets dragged to different places. This is one of the top 10 amazing devices you should buy in 2011, which has undergone a change in its interface, as the durability has improved by leaps and bounds with the price getting slashed to a purse-friendly range.

4 core laptop on Christmas? (2011-08-22 15:07)

I sent in my request for a Acer Aspire laptop with AMD Phenom II X4 N970 2.2GHz, 4GB DDR3, 320GB HDD, DVDRW, Radeon HD 4250, 15.6" Display. It's only \$30 over parent's price range for this years Christmas present. If true, it'll override the free Playstation Vita.

Dragon Ball Z (2011-08-22 21:04)

Due to popular demand on IMDB, I found this on Ebay and bought it. I watch it when it was airing. I watched Mighty Morphin Power Rangers between 1993 - 1997 and had an option of buying MMPR, yet I didn't. Mighty Morphin Power Rangers didn't have a very good score at IMDB (5.3).

Dragon Ball Z was, to many, one of the most influential cartoon series ever in the world. When I was younger I grew up watching the whole series from start to finish, read the comic books, and played the video games. The Dragon Ball Z series contain some of the most charismatic characters, great fighting sequences, and strong plots that covered thousands of years. Originally created in the 1980's, it's truly a blessing that western audiences finally gets to see it in english. However I wish the series would start from the very beginning, the story when Son Gokou was a courageous little boy who uses his innate fighting talents to help out others.

It's only a shame though that the western TV version are heavily censored, causing disorientation and lack of flow to some of the original fight scenes. The Japanese version showed no-holds barred violence and the use of strong words (aka swearing), creating emotional tension that is not present in the english-language version.

anti-US Chinese have Carrier killer missile (2011-08-24 17:25)

Communist Party in China funded a new super missile that can sink a Nimitz aircraft carrier within 900 miles of the coast. The new missile is called the Dong Feng (or East Wind) 21D. They attack our government computers all the time. It's a cyber cold war.

DF-21 is a two-stage, solid-fuel, medium-range ballistic missile (MRBM) developed by the 2nd Aerospace Academy (now China Changfeng Mechanics and Electronics Technology Academy) in late 1970s. It was the first solid-fueled ballistic missile deployed by the Second Artillery Corp. The missile carries a single 500 kt nuclear warhead, up to 2,500 km range. The DF-21 also served as the basis for the submarine-launched ballistic missile (SLBM) JL-1 (CSS-N-3), used on the XIA-Class SSBN. In 1996, an improved variant, the DF-21A, was introduced. Currently, an estimated 60-80 DF-21/DF-21A are in service.

The only thing that can protect a carrier is a HELLADS (High Energy Liquid Laser Defense System) pod on the flight deck. Maybe have some HELLADS on the West Coast. Maybe have a LGM-118 Peacekeeper re-commissioned, because it is 15 years newer than the LGM-30 Minuteman III in service until there is plenty of HELLADS manufactured.

Como Park (2011-08-26 12:24)

Mary Shelley reverses Alzheimers (2011-08-28 01:34)

Deep brain stimulation 'reverses' the famous disease from 5 % to 8 % by injecting electros like Victor Frankenstein once did with his monster!

**Minnesota State Fair @ Night (2011-08-28 09:08)**

I was at the MN State Fair at night and I ate french fries. I heard Daft Punk somewhere like I do every year here. Daft Punk is a House music act. I took a picture of all the lights.

Ceasing oil is correct? (2011-08-31 23:00)

Both President GW Bush and Barack Obama are too stupid not taking complete control of Iraq's oil fields for US usage allowing Iran to cease the oil fields. US should leave the anti-United States United Nations. US cannot have both expanded medicare and a great military, because US is no longer a rich country. China is ripping off the US a lot, and yet China is stealing many jobs. He knows OPEC raises the oil prices once the US gets out of recession so we should cease Iraq's oil and grow domestic supplies in the Gulf of Mexico oil rigs or in the continental US.

Now a neo-conservative like Rick Perry would beef up the military spending, but I wonder Romney would also do the essentials like Gerald Ford aircraft carriers, Virginia Class subs, anti-gravity projects, High Energy Liquid Laser Defense System, drones, aircraft, HUMMVEE replacement.

Anonymous (2013-09-15 15:12:37)

He has suffered multiple crushing wounds of the chest, the nurse's best initial enrolled nurse courses distance action? He had a pacifier, or a life-threatening birth experience.

I was a labor and Enrolled Nurse Courses Distance at a local farmers market, and has been in under development for more than 3 pounds 5 ounces. Without enrolled nurse courses distance the monitor there is no established way for a mother.

13.9 September

PC-BSD 8.2 impressions (2011-09-03 19:36)

This is my 3rd UNIX after OpenSolaris 2009.06 and Solaris 11. It runs the KDE 4.5.5 and Gnome 2.32 desktop environments. It has a long uptime is an indication that no crashes have occurred and no kernel updates have been deemed needed. Unlike Solaris 11, the PC-BSD DVD gives you LibreOffice, The Gimp, Empathy IM, all the KDE and Gnome programs. I test it on the PC that only takes Ubuntu Linux & Linux Mint. It does feel like a Linux, yet without Crossover Linux Pro. I am searching for free Bordeaux somewhere. I need bordeaux for VLC & Winamp. Kubuntu kicks PC-BSD's butt in all benchmarks! That meaning a less secure Linux would be better. No wonder few go with UNIX.

BSD: Berkeley Software Distribution

I've sampled all four for the past 7 hours. From Rapidshare, these are advanced shareware games. Far past the solitaire or spider solitaire for certain. Am the only person in Wisconsin to have downloaded free Touhou SHMUPs.

Kylin in the Cyber Cold War (2011-09-08 07:23)

I am unsure how much unsecure openSUSE is compared to BSD Unix, but at least I figured it out. The Chinese were using Kylin Unix to attack US Gov's Red Hat Linuxes. Kylin is based on FreeBSD 8.2 UNIX, more stable operating system than Linux. Stability and security should be a concern for the Pentagon. The government prefers Red Hat Linux at the moment.

I recommend entire US gov to switch to FreeBSD flavors to even the odds of the cyber cold war. I had to be self-taught on UNIX. I think Solaris UNIX administration is in the Bachelor programs.

What does this have to do with me? I'm right-wing; therefore, let the Pentagon know of their error.

It's a hoax (never existed)

Bizzare Military experiments (2011-09-10 14:05)

7. The Bat Bomb

Working on the premise any weapon is cooler if it flies in the night on leathery wings, Bat Bombs were proposed by a dental surgeon in the '40s. Naturally the President thought it was awesome so a plan was rolled out to make the night unsafe for anyone that didn't want to have small explosives get stuck in their hair.

The Plan:

Because bats can carry a good amount of weight and tend to sneak into buildings and such, the plan was to make an army of flying rodent suicide bombers and release them over Japan. The little fellas had small napalm explosive kits made for them, which were probably the cutest incendiary devices ever, and then cases were constructed that would be dropped from B-29s, releasing the bats.

6. The Sun Gun

Destroying your enemies from space is the goal of every angry 4th grader and Scientologist. Unbeknownst to many, it was also the goal of the Nazis, who figured a space station/death ray combo would have been gangbusters.

The Plan:

Appropriating the work of less genocidal minds, Nazi physicists began work on an idea that would put a giant mirror in orbit. The mirror, which they planned to design from about one million tons of metallic sodium, would burn cities to the ground, boil reservoirs, crisp people like bacon and probably make all kinds of kids with magnifying glasses huddled over ant hills feel grossly inadequate.

The mirror would be on a space station manned by Nazi spacemen with magnetic boots to help overcome weightlessness, with oxygen provided by on-board pumpkin patches and electricity provided by solar powered steam dynamos. The cafeteria would presumably have food deep fried in love and the rec room would be structured out of the dreams of children and unicorn gonads.

What went wrong:

We did. "We" being all the non-Nazi assholes, the more colloquial name for the Allied forces. When it became clear that we were going to win the war, the US began taking German scientists out of the country and this plan, along with many others, was abandoned. Also, the epic, grand scale, and mind-bogglingly retarded nature of the entire idea was apparently a roadblock that needed to be overcome too, since we couldn't even build the damned thing now, in 2008, if we wanted to.

And trust us, we want to.

5. Project Habbakuk

When Winston Churchill got a hankering to smite his enemies, he aimed for the sky. Actually, he aimed for the ocean, where he wanted to build Holy Fuck That's Insane island. That was renamed Project Habbakuk. It was an aircraft carrier. It was an iceberg.

The Plan:

Wanting to make an unsinkable aircraft carrier that would be so intense as to make enemies shit themselves uncontrollably, and with good reason, the Brits came up with the Habbakuk. Constructed from ice (ever try to sink an ice cube?) the plan was to make it 2,000 feet long with a deck to keel depth of 200 feet and walls 40 feet thick. It would displace 2,000,000 tons (compared to the Navy's current Nimitz class carriers that displace 100,000 tons). So, it was like, really big.

When ice proved to be not entirely feasible a material to build an aircraft carrier out of, they switched to something called Pykrete, which was just ice and wood pulp. It was intense stuff that deflected bullets and since this idea was already probably the craziest thing anyone had ever heard of, why the fuck not?

What went wrong:

Practicality. A small version had been constructed in Canada that weighed 1,000 tons and was only 60 feet long to show that the idea could work. It took three summers to melt the damn thing. The full-scale model would take \$70 million, 8,000 people and eight months to finish, the finished product could only travel at six knots and once it arrived where it was going, it would still be made of fucking ice.

4. The Stargate Project

Sadly having nothing to do with fighting aliens who pretend to be Egyptian gods, the Stargate Project was the CIA's way of saying goodbye to \$20 million, but getting a fun story to tell the grandkids as a result. The project was an effort to discover if psychic remote viewing was real, because if it was then that would make spying a whole lot easier.

The Plan:

Apparently the Commies were spending a lot of money on paranormal research during the Cold War. So if they were doing it, the CIA wanted a slice too, before the Reds whipped out some dude who could kill the President with his mind. They started the Stargate project in the '70s with a crack team of gifted psychics provided by the Church of Scientology. Seriously.

What went wrong:

They realized right away there probably wasn't anything to the whole psychic/remote viewing thing. And by "right away" we mean 25 years later. The project lasted until 1995.

Research into the project's validity concluded that while the remote viewers could get some details right, they were also doing a stellar job of getting a shitload wrong. In fact, many say the results were exactly the same as having a group of random hobos make wild guesses, and that you could just as accurately uncover enemy hideouts by having a camel spit at a wall map.

Hey, did we mention that we spent \$20 million to find that out? Don't feel bad, the Soviets spent 500 million rubles to find out the same thing.

#3.

The Pain Ray

The Active Denial System, often referred to as the Pain Ray, is a futuristic sounding way of making sure someone is about to have a really terrible day or improperly cooked microwave burritos. Designed as a method of crowd control, the ADS does just what the nickname suggests, it causes pain. At a distance!

The Plan:

In certain situations, it seems the military doesn't want its own people getting too close to the danger, but at the same time doesn't want to start picking off rowdy crowds with a sniper hidden on some kind of grassy knoll because that makes for very bad press. So developing non-lethals that make people do what you want has recently become very popular.

Thus the Active Denial System is born, a long-range weapon that uses electromagnetic radiation at a high frequency and can be directed at targets close to 500 yards away. It causes the water molecules in a person's skin to get "excited," which is a pleasant way of saying it microwaves you. But not in a permanently damaging sort of way. Maybe.

What went wrong:

Nothing, yet. They've built the thing, and it works. The ADS was first developed over a decade ago and after many trials and tests, the US military seems to have a hankering to get them into Iraq very quickly.

A lack of research into long-term effects or prolonged exposure to the weapon have some people wondering if it's such a great idea, since probably no one has volunteered to have their eye microwaved yet to see what that's like, but meh. It's called the Pain Ray, not the Rainbow Shooter. That's what you get for not dispersing on your own, angry mob!

#2.

Malodorants

Another non-lethal method of crowd control and also a psychological weapon, malodorants, or stink bombs, are supposed to create a stink the likes of which you can't imagine. Worse than rotten meat, backed-up sewage or another trip to the dump with dad to find mom an anniversary present.

The Plan:

Military forces have been playing with this idea for decades. A number of smells have been patented, including the smell of human feces, which makes us think we probably owe a hell of a lot of royalties to someone every day at about

8AM. In the Second World War, some intrepid people invented the hilariously named Who Me? as a way to make Germans disperse as well as humiliate them by making them smell worse than people on the bus.

The US has something called US Government Standard Bathroom Malodor which is apparently so bad, people who have experienced it actually start screaming within seconds. Written accounts describe it as smelling like every bad smell you can think of, put together, times ten. Reports say it actually creates visible cartoon stink lines in the air. The military thinks that's as hilarious as we do and wants to throw it at people.

What went wrong:

Though the ideas are still being developed, the fact is, historically, they don't work out so well on account of you're going to end up smelling like unbelievable ass too. Back in WWII, Who Me? couldn't really be effectively used since it not only made the target stink, it made the bomber stink and the entire area where the bomb went off stink.

Stink is a fickle mistress, and obeys no master.

Project Acoustic Kitty

When you think of spying, odds are you think of jamming a radio inside of a cat so it can listen in on stuff. And if you don't, you really need to have a good, long think about what kind of person you are. Anyway, in the '60s, the CIA hatched this idea to make a cat into a listening device and stick it to some dirty Commies.

The Plan:

The how and why of this project was probably torn up and shat on by whoever came up with it in an effort to save a shred of dignity, but nonetheless, what has survived is a plan to implant a battery and a microphone in a cat, with the antenna running up through its tail. They could let the cat loose and no one would be any the wiser of the mystery cat sitting nearby.

What went wrong:

Public transportation. It turns out, in a strange twist of logic, that once you put a battery, a microphone and an antenna inside a cat, it is not immune to taxis. So, after spending several millions of dollars and years in research, the CIA released their spy cat on its test run and a cab ran it over.

The project was then scrapped and no one spoke of it again.

If you liked that, you just might enjoy last week's article about 7 Insane Conspiracies That Actually Happened. Then go watch a smug 60 Minutes reporter get zapped with the Pain Ray. You know, for the sake of journalism.

Cheap 750-inch TV in November! (2011-09-11 15:56)

Sony HMZ-T1 Head Mounted Display has two .7-inch OLED displays that can produce a 1280×720 resolution image. Each OLED screen can be tweaked according to your eye, and because each one sits just inches from your field of vision it creates what looks like, or feels like a 750-inch display viewed from 60 feet away. The HMZ-T1 does HDMI devices.

If you don't care about a partner for single player games than this would be the most cost effective way for viewing video. I already have a 1080p HDTV so I won't be buying Sony HMZ-T1. This visor is for Generation Z people in public schools.

I don't think it'll sell well, because most Americans aren't fighter pilots. Nintendo Virtual Boy failed for a reason. Playstation Vita is better usage of money than HMZ-t1 ever will be.

One World Trade Center (2011-09-11 20:32)

One World Trade Center will be the tallest building in the United States, standing at a symbolic height of 1,776 feet.

Tribute of Lights
Do i get any comments?

Windows vs. BSD (2011-09-12 11:55)

Since when was Microsoft Windows 7 a safe option? The rest of the world on UNIX (PLA going FreeBSD and Chinese private sector running Linux), and department stores only go so far as to offer Apple MAC (a FreeBSD UNIX variant) for the niche 6 % compared to Windows 85 %. Department stores should offer PC-BSD UNIX on shelves, because it does a favor to Department of Homeland Security.

It is the department stores fault for having this inferior Windows7 monopoly and technical expertise retarding the issue. The ZoneAlarm PRO Firewall won't save Americans, because UNIX is so much more advanced, secure, and stable. It isn't safe for US in a cyber cold war with China, Russia, Vietnam, and India.

The cost of UNIX shouldn't be at MAC prices. The government should be handing out PC-BSD like they've done with ATSC equipment.

gray goo problem (2011-09-13 15:01)

Technology is all about making things smaller, and to that end, right now they're working on making the smallest things possible. Nanotechnology is the science of making robots that aren't much bigger than a molecule, and there are lots of reasons for doing it, the biggest being because we fucking can.

Imagine sending a million microscopic machines into a person's bloodstream programmed to attack a tumor, or shoot the AIDS virus with tiny little phasers. Imagine swarms of little cleaning droids mopping up the pollution in our rivers, or tiny manufacturing droids that can build anything we want, in seconds, molecule-by-molecule.

The big problem is, of course, how you actually build trillions of these little bastards. Simple: you teach them to replicate like cells, using materials from the environment.

Just think about, like, a million of these little fuckers!

What Could Possibly Go Wrong?

K. Eric Drexler, one of the founding fathers of the whole nanotechnology concept, came up with a number of spine-chillingly plausible doomsday scenarios. The problem is our nanobots would be like cellular terminators, much more advanced than any of the pansy-ass creations nature invented. They could out-compete organic life overnight, obliterating it in a frenzy of Darwinism.

A million of these little fuckers!!

Taken to its extreme, we have the scenario affectionately known as the gray goo problem, which speculates the machines would simply start replicating out of control until everything in existence is just a mass of tiny, scuttling robots, which scientists imagine would look like a pile of gray slop floating through the void.

So, Basically It's Like...

Imagine you meet a magical leprechaun. For a bargain price, he offers to fix up the your house and add an extra room. So you take him home, and he proceeds to eat your house and shit out a hundred and forty more leprechauns, which promptly murder you.

How Long Have We Got?

Scientists excitedly assure us that we will have a fully operational murderous death-swarm within twenty years, maybe even as soon as 2010. Right now they're trying to build something called a fabricator, which from our reading is some kind of indestructible robot swarm-queen built out of diamond, who will give birth to trillions of nanomachines and command them to consume all in their path.

Trains: Episode 1 - St. Croix County (2011-09-13 17:03)

Lets celebrate the locomotives that pass thru ST. Croix County. I got ones that were old school from 20 yrs ago! The EPA wasn't so much economic planning 20 yrs ago and the pictures look nostalgic. US got more tracks than China

(not for long)! O-well.

gain more than lose moving away (2011-09-15 02:25)

The status quo is way too high in the United States. I have to travel to commonwealth country (Canada, Australia, New Zealand) so I don't live alone, think alone, travel alone, die alone.

I live one of the most complex culture in the world, and then I can go to Canada/New Zealand > Australia and live the American Dream there with my dual citizenship.

Being stranger to someone is extremely hard – very, very catch 22ish. The relationship is a very hardcore capitalist thing. You actually have to know quite a few things to have a relationship. For example, if I had social anxiety in the US, I be perfectly normal in Australia, Canada, New Zealand . The reader sees why this is catch 22.

Imake gains in community, lesser anxiety by not living in the US, and life is easier in the commonwealth. I don't have to think nearly at the level in the US to date, party, drink, small talk, go places with the same people repeatedly.

In this society, my anxiety skyrockets due to culture The level of common sense I need here far exceeds any commonwealth nation.

I'd do okay stuck in medicare tradeoffs in Canada, Australia, New Zealand. Life wouldn't so hard like in US. I'd meet a lot of people, obtain a lot more feedback and learn a lot more in Canada or Australia or New Zealand and thus making them better for me. All my troubles are mind boggling obvious - culture and most of the choices present are catch 22. I'm going to have to find a way out of US if I am going to have any sort of attention and without the catch 22s. I don't know why so few (born) Americans have dual citizenship.

http://travel.state.gov/travel/cis_pa_tw/

http://travel.state.gov/law/citizenship/citizenship_778.html[cis/cis_1753.html](http://travel.state.gov/law/citizenship/citizenship_1753.html)

Dual nationality can be safety net in case the foreign country doesn't give the results mentioned above! The law has to keep me safe until I find long-term success .

The best movies of all time (2011-09-19 08:57)

1. Casablanca (1942), dir. Michael Curtiz
2. The Godfather Part II (1974), dir. Francis Ford Coppola
3. North By Northwest (1959), dir. Alfred Hitchcock
4. Citizen Kane (1941), dir. Orson Welles
5. Lawrence of Arabia (1962), dir. David Lean
6. Manhattan (1979), dir. Woody Allen
7. Gone With The Wind (1939), dir. Victor Fleming
8. Chinatown (1974), dir. Roman Polanski
9. The Man Who Shot Liberty Valance (1962), dir. John Ford
10. City Lights (1931), dir. Charles Chaplin
11. Raging Bull (1980), dir. Martin Scorsese
12. Sunset Boulevard (1950), dir. Billy Wilder
13. 2001: A Space Odyssey (1968), dir. Stanley Kubrick
14. The Philadelphia Story (1940), dir. George Cukor
15. To Have and Have Not (1944), dir. Howard Hawks
16. The Graduate (1967), dir. Mike Nichols
17. The Maltese Falcon (1941), dir. John Huston
18. Star Wars (1977), dir. George Lucas
19. It's A Wonderful Life (1946), dir. Frank Capra
20. The Wild Bunch (1969), dir. Sam Peckinpah
21. Vertigo (1958), dir. Alfred Hitchcock
22. Singin' In The Rain (1952), dir. Stanley Donen and Gene Kelly
23. The Godfather (1972), dir. Francis Ford Coppola
24. E.T. - The Extra-Terrestrial (1982), dir. Steven Spielberg
25. The Palm Beach Story (1942), dir. Preston Sturges
26. Blade Runner (1982), dir. Ridley Scott
27. Double Indemnity (1944), dir. Billy Wilder
28. The Manchurian Candidate (1962), dir. John Frankenheimer
29. All About Eve (1950), dir. Joseph Mankiewicz
30. The Searchers (1956), dir. John Ford
31. Rear Window (1954), dir. Alfred Hitchcock
32. Annie Hall (1977), dir. Woody Allen
33. Ninotchka (1939), dir. Ernst Lubitsch
34. Blue Velvet (1986), dir. David Lynch
35. The Wizard of Oz (1939), dir. Victor Fleming
36. Bringing Up Baby (1938), dir. Howard Hawks
37. The Bridge On The River Kwai (1957), dir. David Lean
38. Dr. Strangelove or: How I Learned To Stop Worrying And Love The Bomb (1964), dir. Stanley Kubrick
39. Pulp Fiction (1994), dir. Quentin Tarantino
40. Some Like It Hot (1959), dir. Billy Wilder
41. On The Waterfront (1954), dir. Elia Kazan
42. One Flew Over The Cuckoo's Nest (1975), dir. Milos Forman
43. Taxi Driver (1976), dir. Martin Scorsese
44. Touch Of Evil (1958), dir. Orson Welles
45. Nashville (1975), dir. Robert Altman
46. Apocalypse Now (1979), dir. Francis Ford Coppola
47. The Hustler (1961), dir. Robert Rossen
48. The Big Sleep (1946), dir. Howard Hawks

49. Bonnie And Clyde (1967), dir. Arthur Penn
50. Unforgiven (1992), dir. Clint Eastwood
51. Network (1976), dir. Sidney Lumet
52. The Silence of the Lambs (1991), dir. Jonathan Demme
53. Jaws (1975), dir. Steven Spielberg
54. The Deer Hunter (1978), dir. Michael Cimino
55. Hannah and Her Sisters (1986), dir. Woody Allen
56. Gunga Din (1939), dir. George Stevens
57. Schindler's List (1993), dir. Steven Spielberg
58. Hud (1963), dir. Martin Ritt
59. The Third Man (1949), dir. Carol Reed
60. Modern Times (1936), dir. Charles Chaplin
61. Raiders of the Lost Ark (1981), dir. Steven Spielberg
62. Red River (1948), dir. Howard Hawks
63. The Empire Strikes Back (1980), dir. Irvin Kershner
64. Hamlet (1948), dir. Laurence Olivier
65. Notorious (1946), dir. Alfred Hitchcock
66. A Streetcar Named Desire (1951), dir. Elia Kazan
67. Last Tango in Paris (1972), dir. Bernardo Bertolucci
68. Sweet Smell of Success (1957), dir. Alexander Mackendrick
69. Out Of The Past (1947), dir. Jacques Tournier
70. All That Jazz (1979), dir. Bob Fosse
71. Top Hat (1935), dir. Mark Sandrich
72. The Misfits (1961), dir. John Huston
73. Tootsie (1982), dir. Sydney Pollack
74. Mr. Smith Goes to Washington (1939), dir. Frank Capra
75. Short Cuts (1993), dir. Robert Altman
76. The Grapes of Wrath (1940), dir. John Ford
77. The Apartment (1960), dir. Billy Wilder
78. A Clockwork Orange (1971), dir. Stanley Kubrick
79. Psycho (1960), dir. Alfred Hitchcock
80. Moonstruck (1987), dir. Norman Jewison
81. GoodFellas (1990), dir. Martin Scorsese
82. Stagecoach (1939), dir. John Ford

Super Mario 64: Star Road (2011-09-20 15:46)

I often wondered what Super Mario 64 2 would look like, and I don't mean Super Mario 3D Land here. There is a N64 Rom that I cannot wait for them to put inside a flash cartridge. It'd be worth \$100 instead of \$8. Someone used Toad's Tool 64 to create this sequel. This is a full hack with 121 stars and new locations.
<http://www.romhacking.net/forum/index.php?topic=11960.0>

Super Mario 64: The Missing Stars (2011-09-20 16:08)

I often wondered what Super Mario 64 2 would look like, until I found out there was a full hack out there with 38 stars. I wasn't aware of any 3D Mario hacks.
 38 stars in about 10 new levels
 A Day/night cycle replacing (most) act selectors
 Choose to play as Mario or Luigi
 Modified enemies, objects and bosses (too many to list!)
 Custom music, including one original song (the town "night" music)
 A new final boss fight
 Screenshots

Deer Hunting with Uncle Episode 2 (2011-09-25 13:17)

I downsized my deer This doe was shot with a Weatherby Mark V. It died in Northern Wisconsin in Eau Claire County, approximately 5 miles north of Mondovi, WI.

Super Mario 64: Star Road (2011-09-26 00:00)

I often wondered what Super Mario 64 2 would look like, and I don't mean Super Mario 3D Land here. There is a N64 Rom that I cannot wait for them to put inside a flash cartridge. It'd be worth \$100 instead of \$8. Someone used Toad's Tool 64 to create this sequel. This is a full hack with 121 stars and new locations. <http://www.romhacking.net/forum/index.php?topic=11960.0>

Ubuntu kernel upgrade (2011-09-29 14:29)

Go to <http://kernel.ubuntu.com/kernel-ppa/mainline/>

1- Install linux-headers-2.6.32-020632 _2.6.32-020632 _all.deb (ending by all.deb)

```
sudo dpkg -i linux-headers-2.6.32-020632 _2.6.32-020632 _all.deb
```

2- linux-headers-2.6.32-020632-generic _2.6.32-020632 _i386.deb (headers ending by i386.deb or amd64.deb depending of your architecture)

```
sudo dpkg -i linux-headers-2.6.32-020632-generic _2.6.32-020632 _i386.deb
```

3- linux-image-2.6.32-020632-generic _2.6.32-020632 _i386.deb

```
sudo dpkg -i linux-image-2.6.32-020632-generic _2.6.32-020632 _i386.deb
```

4 - Reboot your computer.

Anonymous (2013-05-25 15:11:21)

Hey there! This is kind of off topic but I need some guidance from an established blog.

Is it hard to set up your own blog? I'm not very technical but I can figure things out pretty quick. I'm thinking about creating my own but I'm not sure where to begin. Do you have any ideas or suggestions? With thanks

Here is my webpage ... [exercises to increase vertical jump](#)

13.10 October

Developers should make Wii U beat PS2 (2011-10-03 12:21)

Develop these. Last gen is boring with obsolete visuals! Wii is very similar to Xbox. I cannot get why there isn't more Wii U discussions.

Nintendo probably make 2x as much money remaking these games or finding developers who would than to create new games. You know Chrono Trigger is ranked highly on DS and that Super Mario World is highly ranked for GBA. Ocarina of Time is the most wanted game for Gamecube & 3DS on Gamestop.com. It makes perfect sense. Banjo and Kazooie went on Xbox 360 so Wii U works and Rareware developed for DS. Mass Effect for PC was Electronic Arts

EFX3 died: 2007-9/2011 (2011-10-12 07:47)

When Modblog died in June 2006, I got 58,000 hits for being able to write lots of entries. The successor was supposed to be EFX2. Then I went to EFX3, because of the blogspot import. All the EFX2 bloggers went to EFX3, because they all thought EFX2 died in terms of page views and comments. They didn't have "networkblogs" to save their site, a RSS feed for Facebook. I was the 0.5 % who saved my posts from 2002 - 2005! At the bloggers.com, anonymous gave my EFX3 site a 8 out of 10 (too black and white). More of them probably backed up *.XML (wordpress) and went to wordpress.com.

What really is the shits is the Waybackmachine didn't snapshot my EFX3 site.

Linux Mint Debian 201109 review (2011-10-12 14:53)

There is something wrong with Ebay, everybody sells Debian 6, but not Linux Mint Debian 201109. What's wrong with those people? Somebody messed up knowing there was a Linux Mint Debian 201012 and decided not to wait. Linux Mint Debian 201109 is an improvement! It is based on the solid 2.32.2 Gnome that is much more responsive and stable over still buggy Gnome 3.2. The old Linux Mint 11 came with 2.6.38.6. LMDE 201109 comes with kernel 3.0.5. It's more responsive and uses less memory than Linux Mint 11.

Right now, I updated Firefox 7.0.1 and that runs great. My HP Printer runs great.

Ubuntu 11.10 comes out tomorrow right and Ubuntu is the most popular Linux Distro. Well Linux Mint Debian 201109 is superior version to Ubuntu 11.11. I have mine loaded with Crossover Linux 9.2.1 and it's great. Winamp runs great. LMDE 201109 comes with VLC 1.1.10, LibreOffice 3.4.2, Xchat, Firefox 6.0.2, The Gimp.

It didn't crash on me yet! It only went to sleep twice for 5 seconds (with Firefox 7).

I give this OS 9.0/10. Cream of the crop!

8.2 no longer found on ebay until 9.0 is out. PC-BSD is more stable than Linux Mint 201109 Debian, yet these days you can't tell. I got linux, pc-bsd and windows in GRUB booting. Notice that Linux uses 488 MB of RAM and BSD uses 1 GB+. The BSD could run for 240 days straight

Free domain name (2011-12-09 06:35:10)

why would you use Winamp through CrossOver if you can run native audacious, which in classic interface (View>Interface) even supports Winamp skins?

Free Q4Wine for PC-BSD (2011-10-13 14:40)

I found a free Wine frontend for PC-BSD 8.2 for running VLC and Winamp! Bordeaux is better and it takes \$20.
I found a Q4Wine PBI installer mirror #1 mirror #2 mirror #3

Gameplay dumbing down / noobish (2011-10-18 13:55)

Somewhere between handily completing Assassin's Creed and breezing through nearly all of the missions in Grand Theft Auto IV, it struck me. Have games of today become dumber? This is not to suggest that the stories contained in these games are dumb: Assassin's Creed and GTA have both been praised for their incredible storytelling. What I mean is that it increasingly feels as though game designers feel that we the players are dumb, that we need our hands constantly held throughout a game, lest we throw down the controller in frustration.

These two recent console games, while obvious examples, are not the only offenders in this recent trend of dumbing-down the challenge factor in videogames. The recently released Too Human features automatically scaling enemies so that players will never encounter any foe that is way beyond their level of experience. Fable II will include a "Breadcrumb trail" so that adventurers will never get lost while traveling from one objective to the next in its sprawling fantasy world.

Compare these modern examples with titles that - not too long ago - offered considerably more challenge and really tested both the reflexes and intelligence of players. I grew up with graphic adventure games like Kings Quest, The Secret of Monkey Island, and Conquests of Camelot, all of which are famous for placing taxing levels of difficulty on the player. In a text-based PC adventure game from the 1980s, a typical player interaction might go something like this:

Of course, modern developers have argued strongly that some retro conventions - such as text-only input and broken save systems, deserve to be laid to rest. But even beyond those technical limitations, games from that period placed challenges in the way of the player that are sorely missed in the current crop of adventure games. One of the greatest features of early PC adventures was their ability to make the player feel as though he or she were really exploring a new landscape. There were no overhead maps or radar screens, no invisible walls keeping players from wandering into dangerous territory. Gamers had to feel out the landscape on their own, in some cases even creating pen and paper maps in the real world to keep track of their location in the game. That was one of the reasons why we loved

Etrian Odyssey, an RPG for the DS that uses the touch screen for mapmaking. But games like Etrian Odyssey are an increasing rarity in a market that seems to reward simplicity over challenge.

How did this happen? How did game developers arrive at the notion that what we really wanted all along was less of a challenge in our videogames? Part of the answer can probably be found in the massive economic success of the video game industry. As the digital entertainment market approaches the popularity of film, games have come to resemble Hollywood movies in many respects. Publishers seek to create games that will have massive appeal with the public – a public that increasingly includes new and less experienced gamers, as companies seek to reach out to new consumers. The recent game Spore might not be satisfying to hardcore gamers, but it will undoubtedly sell millions of copies by appealing to more casual PC owners like my father, who has never played a real-time strategy game before. Adventure games have definitely suffered from this phenomenon. They are very expensive to make, because of their extensive use of artwork and voice-acting. Because of that, they must be able to appeal to a large enough audience to recoup the initial cost of development. Consequently, developers are taking less risks and designing their games for the lowest common denominator

All hope is not lost. A small but vocal resistance has formed, made up of hardcore masochists, completists and those who remember what games were like before they became mass-market commodities. These devoted thrill seekers will actually take great care to make their gaming experience as difficult as possible, even in "nerfed" titles like Assassin's Creed. In that game, some hardcore fans decided that playing with the HUD activated was cheating, so they forced themselves to play without a radar map. By forcing themselves to actually hunt for the next objective, these players argue, the experience is improved, and actually approaches the level of difficulty found in earlier adventure games. The hardcore can also be found on YouTube. These are the ones doing speed runs in their favorite 2D platformers, trying to shave a few seconds off of their previous and untouchably fast performance. And of course, multiplayer shooters like Call of Duty 4 offer unlimited challenge, as gamers square off against human opponents that are just as skilled as themselves.

For a real, challenging adventure game, however, options are somewhat slim these days. I hope that some game designers remember the glory days of adventure gaming on the PC, and seek to implement some of the best features from that era in new projects. Give players a sense of control over their destiny, let them make mistakes and suffer the consequences, and let them explore the virtual worlds you create without limitation. Above all, force players to use their brains to interact with your game, rather than simply spoon feeding them cutscenes. Those things are what make gaming great, after all.

Top 10 Horror Games (2011-10-19 19:41)

10. Eternal Darkness: Sanity's Requiem

Have you tried outlast? It's on Playstation 4. Very good game.

<http://www.playerup.com>

PC-BSD 9 (2011-10-25 05:32)

Found out PC-BSD is like openSuse where someone gets both Gnome 2.32.2, KDE 4.7.x, and LXDE 0.5.7. It's redesigned the control panel. 9.0 is easier to install to a ZFS file-system even if 8.2 had one click ZFS install. Note that I use the GUI installer, not 16-bit installer. I'm using q4wine for Winamp in 8.2. BSD stays up for 250 days. It keeps out almost all cyber attacks and malware via being mission critical.

This OS is if your Vista has a Trojan and you reformat and the Trojan keeps coming back. UNIX won't slow down as much over time. I played with Linux, because it's mainstream. I got bored of reconciliation. So Solaris or ProjectIndiana didn't have Libreoffice or VLC or GIMP or Google Chrome or Opera or DVD video playback on them

LaVeyan Satanism similar to libertarianism? (2011-10-31 22:57)

Happy Halloween

LaVeyan Satanism is a religion founded in 1966 by Anton LaVey. Its teachings are based on individualism, social Darwinism, self-indulgence, and "eye for an eye" morality, with influence from Friedrich Nietzsche and Ayn Rand, while its rituals and magic draw heavily from occultists such as Aleister Crowley.

No wonder I didn't like Ron Paul, presidential candidate.

Vita or Radeon HD 5870 (2011-11-02 21:24)

I just got enough money for my birthday for a Playstation Vita or a Radeon HD 5870. I cannot decide which way to go do I am sitting on a fence as far as it goes. I could use the BFGtech Geforce GTX 280 which barely meets Elder Scrolls V high pc requirements. At this point, it is common sense for Christmas 2012 for the Radeon HD 7870 and put my Radeon HD 5970 in my older PC.

Other games I anticipate are Uncharted 3, Elder Scrolls V for PC, Super Mario 3D Land, and then Mass Effect 3 in January.

I'm swamped with college homework since October. I'm coasting through the Gamespot not really hardcore game blogger. I search at night, because I like to think a little bit. I find that comprehending the post is difficult at night so I do lists instead!

For Christmas. The only reason I am getting a laptop is if I am paying electricity. It saves wear and tear on my case fans or 850 watt Power Supply Unit, but mainly it is to reduce the electricity bill. I am probably going to ignore the laptop until the electricity bill bites me in the ass five years from now. If I had digital camera JPEGs, there is nobody important enough to show off too so iPad, what's that? I shown jpegs once on Playstation Portable to my first date in 2005.

digital distribution (2011-11-05 22:24)

I read a lot on digital distribution of PC games or Virtual Console. I know I saved \$3000 on Roms, ISOs and stuff. It mostly was rom games for old consoles in 1999 - 2005, because PCs could emulate old consoles. Search 'roms'.

It seems like the Gamestops and other non-big box stores are beginning to die, because of Rom collecting or ISOs. I hate Steam. There is zero tolerance for used game ownership. Fortunately, I got out of this through Target gift cards. Electronic Arts encryption is more tolerable, I have to use No-DVD crack on all their newer games just to execute. I played all the Saturn shooters at least once, and played enough expensive Sega Saturn games for a review. It's nice skip paying \$150 just to play Panzer Dragoon Saga or Radiant Silvergun.

I downloaded a few PC games: Monkey Island Special Edition, Monkey Island 2 Special Edition, Battlefield 2142, Spellforce 2, GTR 2, GTR, Formula 1.

The Japanese likes handhelds, because most own DS and PS2 in a large margin. The Nintendo DS came out on top, with 62.1 % of the group owning at least one iteration. The PlayStation 2 came in second at 58.5 % .New Consoles are 6th, 7th, 8th and 9th place.Japan Loves Old Games, But Not Older Gamers. Things have become far more corporate and structured. Strangulation might follow if changes don't occur. DS and PSP are more popular in Japan. So Japan won't buy as many new games, yet Americans would.

I'm trying to think on what obsoletes videogame sessions with Americans?

I know it's called Facebook, Farmville. The primary successor is taking pictures for facebook daily. Facebook photos and amateur photography replace videogames all together! People don't want to buy too many games as a result. I am the only person in class of 2003 in St. Croix County (including 2004-2011) who blogs anymore! They're Facebook hardcore posters entitled too much to join Google+ (joined Google+ five months ago) even blogs EXCEPT youtube . Lesser substitutes are iPad, iPhone, Android OS for photography for flickr or photobucket.

US has Type 1 characteristics. (2011-11-11 00:11)

On 2250, the Earth reaches a Type 1 civilization on the Kardashev scale at the current rate. This is achieved by computers with semi-quasi reasoning skills and fusion energy. This is impossible with anything other than fusion power

plants. In 2011, Earth's at .72 so hydrogen power plants will make it to .73.

Bottom line, nobody ever needs to be type 1 status with all the spacecraft crashes within 114 years since 1897 Aurora, TX in my opinion. Discovery should be 1000x easier especially with surgical laser instruments on spaceships (Roswell). Laser Inertial Fusion Energy is supposed to work in 2020 far before any International effort. There is supposed to be a demonstration in 2012.

Newt Gingrich said that our fission reactors are on their last legs and need attention and funding since 2000

All you need is a really, really primitive dyson ring (Dyson swarm) and some lasers for wireless transfer to be Type 1.

New arcade stick (2011-11-11 16:20)

I had one HORI real arcade pro 2 for PS2 from 2005 which I never blogged about. I needed another HORI real arcade pro 2 so Ebay gave me a \$67 deal. The PS2 versions are 50 % cheaper and bought a \$4 PS2 to PS3 converter. It is a lot better to pay \$67 for this then \$120- \$200 for the PS3 USB version of the same arcade stick. I believe I am getting commercial cabinet quality joystick and buttons with this HORI brand. I can use it for Tekken 4, 5, 6, Virtua Fighter 4, 5, Blazblue Calamity Trigger and Continuum Shift, Soul Calibur II, III, IV, Street Fighter IV, Marvel vs. Capcom 3, Guilty Gear X, Guilty Gear Accent Core, Gradius V, R-Type Final. HORI arcade stick noticeably better than the dual shock 2 and sixaxis.

My lefty church (2011-11-18 13:43)

In this religion, the dove is the "holy spirit" I don't go to church anymore

Redeemer Lutheran Church

Pastor Marilyn Thurber

Date: March 27, 2013

To: Ian Campbell

From: Rev. Marilyn J. Thurber

Re: Confirmation and Church Membership

Per our phone conversation today Ian, I am sending you a copy of our church record book showing that you were indeed a member of Redeemer Lutheran Church, then located at 1097 County Road A, Hudson, WI. in 1999. The page shows that you were confirmed on October 31, 1999. I do hope this is helpful. It was nice talking with you after all these years.

In Christ,

Rev. Marilyn J. Thurber

openSUSE 12.1 64-bit review (2011-11-18 21:36)

With the sea-salt whiff of Fedora 16 still hanging in the air, we now have another updated Linux distribution based on the new 3.1 kernel. OpenSUSE 12.1 offers the GNOME 3.2 shell along with KDE, Xfce and LXDE desktop flavors should you prefer something different. There are goodies like Chromium 17 and Firefox 7 and improved server side tools including WebYaST, Horde 4 apps and the ability to run on the Amazon EC2 cloud. The source link below lists plenty more improvements and of course they're all free. Software should also run faster on SUSE machines thanks to the link-time optimisation of GCC 4.6.2.

Here a Windows installation exists in parallel, openSUSE defaults to installing the boot manager in the Linux partition's boot sector and sets the active flag for this partition.

Special highlights are the Btrfs snapshot management tools and the resulting roll-back function in Yast – no other distribution currently offers this functionality. The Yast module doesn't yet allow users to create custom snapshots or delete individual snapshots from the list.

openSUSE 12.1's default browser is Firefox 7, its default email client is Thunderbird 7.0.1, and LibreOffice 3.4.2 is included.

the Packman repository should be enabled in the software manager of openSUSE's Yast admin tool, as it contains various multimedia codecs.

ZFS is copy-on-write, self-healing with 256-bit checksums, supports compression, online pool growth, scales much better than the UFS file-system commonly used on BSD operating systems, supports snapshots, supports deduplication, and the list goes on for the features of this file-system .

Otherwise, BTRFS is a lot faster (3x) with compression enabled than ZFS. BTRFS also beats EXT4. At 32 threads of 32MB random writes, BTRFS continued running just fine (36MB/sec) while ZFS dropped to writing at 1.67MB/s, this was barely faster than the UFS+S speed of 1.63MB/s.

Remember BSD 8.2 BSD has slower file system, but more highest security and built for mission critical data like databases like health records that need protection from Chinese.

desktop shells 9.0 - KDE 4.7.2 faster than KDE 4.6.0 in 11.4 and KDE 4.5.5 in PC-BSD 8.2
 filesystem 10 - beats ZFS in performance
 overall 9.0

PC-BSD vs. Linux (2011-11-19 04:30)

Windows 7 does not shut down properly sometimes. openSUSE and Linux Mint both shut down everytime. The Linux's goes into a coma for 10 seconds and logs out if you install something. Firefox went into a coma the most in Linux Mint.

Programs on PC-BSD 8.2 never ever went into a 10 second coma or any coma! PC-BSD 9 is supposed to have KDE 4.7.4!

PC-BSD defeats Linux, but not in politics. I'm just saying Jurassic Park ran on IRIX UNIX and UNIX is FREE!

Anonymous (2012-02-09 10:11:37)

I love PC-BSD 9.0, it's very stable on my system. I've only had two issues so far, Minecraft and Skype. Minecraft chokes and skype starts having problems about six minutes into every audio conversation. Neither is a show stopper for me and it'll all get sorted out sooner or later.

OPERA neutrino anomaly (2011-11-19 13:15)

OPERA neutrino anomaly has obsoleted Einstein's Theory of Relativity, because he uses a worse than light-speed algorithm. CERN will have to create an exception using a Theory of neutrino anomaly relativity. They arrived earlier by 60 nsec. Within the Standard-Model Extension (SME theory), various theorists have suggested that the neutrino have tachyonic nature. The faster-than-light propagation is possible without requiring moving objects to have imaginary mass. The Standard-Model Extension (SME theory) explains how neutrinos go faster than light speed. Neutrinos are found in nuclear reactors, nuclear bombs. Frederick Reines and Clyde Cowan originally found neutrinos inside nuclear bombs in 1956.

The spaceships use neutrinos so they must be plasma-based engines and we already have military astronauts in those TAW-50 fighter-bombers running on neutrinos/nuclear fission and magnetic anti-gravity mechanisms to sustain their structural stability with high MACH speeds. We can upgrade those in the near future.

The Manchurian Candidate (2011-11-22 15:31)

We now have gutted NASA, thanks to his Manchurian politics. At least we know where he gets his politics. He gave all our high tech space data to china or at least waiting for China to land to the moon, right? Obamacare is a 5 year plan. There is also a five year plan on offshore drilling. There is a 5 year plan on NASA budget freeze.

I wanted to use the Smith act (18 U.S.C. § 2385) for impeachment, maybe.

The American bureaucracy is the Stalinist bureaucracy carried to its ultimate and logical conclusion. CLR James 1955 Vote in someone else quick or smith act

Legend of Zelda timeline (2011-11-25 11:35)

I only knew the Ocarina of Time > Majora's Mask > Twilight Princess timeline and the Wind Waker > Phantom Hourglass > Spirit Tracks. I thought that Wind Waker took place before Ocarina of Time. I didn't know where the hell the other games took place. This is pretty important since Ocarina of Time takes #1 at Gamerankings.com with total of 5,000+ games. Of these I've played Legend of Zelda, Link to the Past, Ocarina of Time, Majoras Mask, Wind Waker, Minish Cap, Phantom Hourglass, Twilight Princess, and Skyward Sword.

THE START: The Legend of the Gods and the Hero of Time]

- Before the events of any game in the series the only know event that happens is that the Goddess creates the earth and heavens and stopped an evil called Demise from taking over the world.

|

The Legend of Zelda: Skyward Sword

Skyward Sword documents the reincarnation of the Goddess Hylia, the ancient battle against a revived Demise and the return of the land in the sky to the surface. During his quest Link must travel through the sky and the land below in order to increase the power of the Goddess Sword. Eventually the Goddess Sword turns it in to the famous Master Sword.

|

- In between Skyward Sword and the events of the next game three eras pass: The Sky Era, The Era of Chaos - which marks the sealing of the Sacred Realm and The Era of Prosperity - the era in which the Kingdom of Hyrule of first formed.

|

-The next two games are both set in the fourth ear: The Force Era.

|

The Legend of Zelda: The Minish Cap

The Minish Cap shows the first true inhabitants of the Kingdom of Hyrule and also marks the rise in power of the Wind Sorcerer Vaati and his untimely death. During the game Link must re-forge an ancient sword that gives him the power to spilt in to four copies of himself.

|

The Legend of Zelda: Four Swords

Four Swords is a continuation of the story from The Minish Cap. It shows the revival of Vaati, and again shows his death at the hand of the four Links.

|

- After Four Swords the fifth era begins: The Era of the Hero of Time.

|

The Legend of Zelda: Ocarina of Time

Ocarina of Time shows the rise to power of Ganondorf, a descendant of Demise, who goes on to win the Triforce of Power. Link must travel back and forward through time on many occasions throughout his quest to rescue the Sages and gain the strength necessary to defeat Ganondorf and bring an end to his reign as the King of Evil.

|

- Here's where things get interesting. After Ocarina of Time there are actually three splits in the timeline, not two as previously believed.

[SPLIT 1: Hyrule's Decline and the Last Hero]

- This timeline, also referenced as timeline C (because nobody knew before now it existed), is what happens after the events of Ocarina of Time if the Hero of Time meets his death against Ganondorf.

|

- After the death of Link the Sealing War takes place. Without Link to defend Hyrule the Sages take it in to their own hands and seal away Ganondorf themselves in the Sacred Realm. While in the Sacred Realm Ganondorf (now transformed permanently in to Ganon) builds up his power and turns it in to the Dark World.

|

The Legend of Zelda: A Link to the Past

A Link to the Past documents what happens when Ganon has gained enough power to break from the Dark World and wreak havoc on Hyrule once again. Using Agahnim to cover up his plan, Ganon finally reveals himself to Link at the end of the game. Link's objective is to find the Master Sword and rescue the seven Maidens before he can even do battle against the King of Evil.

|

The Legend of Zelda: Oracle of Ages/Oracle of Seasons

After the events of A Link to the Past Link travels away from Hyrule to seek and help other lands after receiving a message from the Triforce, this leads to the events of the Oracle games. The Oracle games can be placed in any order (because the games can be played in any order), and when linked together they show the proper ending. It is revealed that Twinrova are trying to revive Ganon, but once again Link is at hand to save the day.

|

The Legend of Zelda: Link's Awakening

After the events of the Oracle games Link is traveling back to Hyrule when his boat is caught in a storm at sea which renders him unconscious. This leads to the events of Link's Awakening. The events of Link's Awakening are believed to be a dream, but if you finish the game without dying you see an alternate ending that does hint otherwise.

|

- After Link's Awakening another era begins: The Gold Era. The Gold Era is the time where the monarchy of Hyrule use the Triforce to grant their wishes.

|

- Eventually the Era of Gold starts to decline, ushering in a new era: The Era of Decline.

|

The Legend of Zelda

In The Legend of Zelda Ganon is revived and kidnaps Princess Zelda in order to acquire the Triforce of Wisdom. But little does he know that Zelda already shattered it in to eight pieces, which the new Link sets off to find before defeating Ganon in a climatic duel, winning the Triforce of Power in the process.

|

Zelda II: The Adventure of Link

The Adventure of Link tells the story of the Hero from the previous game traveling across Hyrule, defeating all the evil to prevent another resurrection of Ganon. When Link succeeds he acquires the Triforce of Courage to go along with the two he found in his previous adventure. He then unifies the Triforce, brings peace to Hyrule and awakens Zelda from her eternal sleep.

|

- These events bring an end to this timeline.

[SPLIT 2: The Dark World and The Hero's Descendant]

- This split in the timeline documents what happens at the end of the Ocarina of Time if Link succeeds in killing Ganon and travels back in time to a child, thus starting The Child Era. When back as a child Link and Zelda inform the King of Ganondorf's planned treason, so they arrest him and sentence him to death before he can put his plan in to action.

|

The Legend of Zelda: Majora's Mask

Majora's Mask is only a side story which shows what happens when Link leaves Hyrule and travels in search of a dear friend. Skull Kid, who possesses the Majora's Mask – a fabled mask of untold power, attacks Link while he was riding Epona through the Lost Woods. Skull Kid steals the Ocarina of Time and Epona, and Link gets caught up in a quest to save a town from getting destroyed by a Moon that will fall from the sky in just three days.

|

- After the events of Majora's Mask Ganondorf receives his death sentence at the hands of the Sages, but when they fail to kill him they open the Mirror of Twilight and send him to the Twilight Realm instead. These events bring an end to the Child Era and start a new one: The Twilight Era.

|

The Legend of Zelda: Twilight Princess

Twilight Princess roughly takes place 100 years after the events of Ocarina of Time and Majora's Mask. While trapped

inside the Twilight Realm Ganondorf possesses Zant and grants him his power. Zant then uses this power to take over the Twilight Realm, transform its Queen Midna in to an imp then invade Hyrule and blanket it in Twilight. Link then rids Hyrule of its Twilight, defeats Zant and then confronts and kills the now free Ganondorf.

- After the events of Twilight Princess a new era begins: The Shadow Era.

The Legend of Zelda: Four Swords Adventures

Four Swords Adventures marks the resurrection of both Vaati and Ganon, only to see them yet again defeated by a Four Sword wielding Link.

- These events bring an end to this timeline.

[SPLIT 3: The Wind Waker and the New World]

- This split documents what happens at the end of Ocarina of Time to the world in the future when Link travels back in time to his original era. With Ganon sealed all is at peace, but one day Ganon breaks his seal and takes over Hyrule unchallenged now that Link has disappeared. Because of his immense power the people of Hyrule can't defeat him, so they pray to the Gods who flood Hyrule with continual rainfall. These events marked The Era Without the Hero.

- After Hyrule floods a new era begins: The Era of the Great Sea.

The Legend of Zelda: The Wind Waker

The Wind Waker takes place on top of a great sea, underneath which Hyrule once was before it was flooded. The only land still visible here are the mountain tops of Hyrule, and people that survived the flooding managed to populate them. This starts the adventure of The Wind Waker, which sees Link travel across the ocean in an attempt to stop Ganondorf terrorizing the inhabitants of the sea.

- When the events of The Wind Waker come to an end another new era begins: The Era of the Great Voyage.

The Legend of Zelda: Phantom Hourglass

After defeating Ganondorf, Tetra and Link set off on a new adventure of discovery to find the fabled Ghost Ship, which is said to contain priceless amounts of treasure. When they find it Tetra jumps on board only for the ship to vanish. With this Link sets off across a new world to find and rescue her.

- When the events of Phantom Hourglass finish a new era eventually begins: The Era of Hyrule's Rebirth. Eventually Link and Tetra discover a new land, which they name the new Hyrule. 100 years pass and their descendants have to fight against a new threat.

The Legend of Zelda: Spirit Tracks

Steam power is the biggest advancement in technology in new Hyrule, as Trains become the main mode of transport. Link and Tetra's descendants must fight against Chancellor Cole and Byrne in order to stop the resurrection of Malladus. They fail to stop his resurrection, but Link goes on to defeat Malladus in a one on one fight.

30 best racing tracks (2011-11-26 08:28)

30. Mushroom City

Game: Mario Kart: Double Dash

Year: 2003

Oncoming traffic, multiple road options, changing colors—this track has everything I look for in a kart track.

29. Smokey Mountain

Game: Gran Turismo 3

Year: 2001

Another great GT track. Want to get comfortable with a car you've been tuning? Work it out on this short mountain course. Sweeping turns, great elevation changes, and unforgiving stages (no run-off = veer and you crash) made it a Gran Turismo favorite.

28. Grand Valley Speedway

Game: Gran Turismo (1-5)

Year: 1998-

This Gran Turismo staple appeared in damn near every installment of the series because it's just that dope. And I'm not just talking about the challenging right-hand hairpin that greets at you at the fifth corner. Turns six through 11 prove perfectly challenging, while the rest of the course allows you to hit some good speeds. Pretty much all you need in a racetrack.

27. Las Vegas

Game: Project Gotham Racing 3

Year: 2005

We usually see Las Vegas while drunk in the back of taxicabs, or through the lens of various horrible TV shows. Project Gotham Racing made me see it in a different light by molding an incredible street course through Sin City. Fly past all your favorite hotels and casinos, but don't lose focus on the glitzy straights: the nearly 90-degree turns are vicious as

a Vegas lap dance.

26. Royal Raceway

Game: Mario Kart 64

Year: 1997

A pretty challenging course for a Mario Kart game, Royal Raceway gives you some hairpins and S-turns, and maybe a few rivers for you to fall into for good measure. Don't think of them as water hazards, though, think of them as cheats necessary components of a speed run

25. Rainbow Road

Game: Mario Kart 64

Year: 1997

The original Rainbow Road! We gave props for the F-Zero X rip-off, so you know I had to respect the architect. Basically the same track ripped off by its futuristic competitor, Rainbow Road is one of the greatest video game tracks ever. Very easy to get lost in the colors and find yourself falling in a black hole.

24. London

Game: Midnight Club: Street Racing

Year: 2000

Commercializing the illegal street racing genre, Midnight Club gave you an outlaw's world of freedom in each world/city you raced through. Our favorite was the London race, which directs you through what would otherwise be an open-world track. Think you can get to the finish line faster than the directions? Go 'head.

23. Nissan Speedway

Game: Forza Motorsport 2/3

Year: 2007, 2009

When I wanted to see my newly modified Toyota Supra hit 227 mph, I went straight to the Nissan Speedway oval. OK, so maybe it wasn't the best for actual racing—but for some late-night, hung-over fun, it was awesome.

22. Peach Beach

Game: Mario Kart 64

Year: 1997

By this point, I've all but mastered the surf & turn track that is Peach Beach. I know where the monsters will be, where to place my car so I hit the power-up ramp, and when to use the shell if I am not in first place (right after the turn onto the last pavement straightaway). How do I know all that? Because 13 years ago, that's ALL I EVER DID.

21. Alcatraz

Game: Rush 2

Year: 1998

Don't remember Rush or Rush 2? Don't feel too bad, they I know run-of-the-mill arcade racers. But Rush 2 came with a dope track called Alcatraz that had multiple levels, tight turns, and some crazy ramps. Was it enough to save a place for the game in my memory? Nah. But it was enough to earn it a spot on this list!

20. Trial Mountain Circuit

Game: Gran Turismo

Year: 1998

The original Gran Turismo's Trial Mountain Circuit did just what its name implies—it tried out talents. The track made us realize that Gran Turismo wasn't like all the other racing sims of the time. Not too long, with corners that allow for precise overtaking and tighter turns that would punish those looking for a quick cut. Many a dream was dashed on that circuit.

19. Twilight City

Game: Wave Race 64

Year: 1996

If you haven't noticed by now, I am like colorful tracks and nocturnal environments in future-based racers. What can I say? We're children of the night. People like to hate on Wave Race 64, saying that the game lost its identity and tried to copy F-Zero; they may be right, but it was still great fun. To wit: Twilight City. Color, night, and future. Trifecta!

18. Blue Mountains Raceway

Game: Forza Motorsport

Year: 2005

One of the most popular Forza tracks has you racing through a verdant countryside on a forgiving track that allows you to get a good feel for the dynamics of the game. More of a free cruiser than an actual racetrack, Blue Mountain Raceway is where everyone returned whenever they needed a confidence boost.

17. Florion Height

Game: Wipeout Fusion

Year: 2002

We had to throw a Wipeout track on here just for the fact that they somehow made everything look like you I'm traveling 3,000 mph.

16. New York City

Game: Forza Motorsport 2/3

Year: 2007

Living in New York City, I am always dream of ripping around the city without consequence. The best recreation of NYC has to be Forza's New York City course. It takes you all throughout NYC—from Battery Park to Times Square. We're pretty sure this is what Bernie Ecclestone had in mind for the NYC Formula 1 race circuit. We can only dream.

15. Shanghai

Game: Project Gotham Racing 4

Year: 2002

One of the narrowest tracks on this list, this track modeled on the city of Shanghai really gives you the impression of driving through the megalopolis' cramped conditions. Floor it on straights, then hop back on your brakes for the true 90-degree turns and sweeping lefts. And, yeah, it's a nighttime course.

14. Opera Paris

Game: Gran Turismo for PSP

Year: 2009

While I waited for fifth Gran Turismo, I was treated to a PSP port that promised the same level of gameplay as the console versions. I can't say that it delivered, but it did offer some interesting new tracks like Opera Paris, which put you smack-dab in the City of Love on a challenging road course. Hopefully its faithful recreation is one of the reasons GT5 has taken so long to see the light of day.

13. Olympic Square

Game: Need for Speed Underground

Year: 2005

If I made a track based in Las Vegas, this is exactly what it would look like. Young, fly and flashy, Olympic Square is perhaps one of the most entertaining courses to race based solely on aesthetics.

12. Motorland

Game: Gran Turismo 4

Year: 2005

Isn't that nice, Gran Turismo gave you the perfect place to practice your car control. Thanks, Kazunori Yamauchi!

11. DK Summit

Game: Mario Kart Wii

Year: 2008

This is the course that took us the longest to master in Mario Kart Wii, but once I learned how to dodge the snow traps on the ramp, I was golden. The key to this snowy course is to, ironically, stay out of the snow. It proved both challenging and fun. Can't ask for more than that.

10. Apricot Hill Raceway

Game: Gran Turismo 4

Year: 2005

At 2.4 miles, the Apricot Raceway is the perfect length. And with 83.7 feet of elevation change, it gives you enough change-ups to keep you on your toes. Classic Gran Turismo.

9. Game: Ridge Racer

Year: 1994

Was there anything more fun to drive than the High Level of the original Ridge Racer? Not in my eyes. It's the course that set the pace for all future RR installments.

8. Deep Forest Raceway

Game: Gran Turismo 2

Year: 1999

Imagine taking a SuperGT spec race car for a spin through the redwood forests in the hilly part of Northern California. Yeah, that's what this course is. Effin' epic. Yet another reason to love the Emerald Triangle. And this one's non-combustible!

7. Port Town

Game: F-Zero

Year: 1990

F-Zero changed my view of what a racing game could be. The game, based on Formula 1 racers from the way, way in the future, had high-powered hover racers and wide, flowing tracks (like my favorite, Port Town) that let them (and us) go nuts.

6. Chicago

Game: Midtown Madness

Year: 1999

I spent most of my time playing in the Cruise mode of Midtown Madness. Instead of racing against others, I just cruised around the seemingly endless expanse of cityscape, acting like I had a driver's license. We've said it before, and I'll say it again: can I please, please get a high-def version for Xbox360?

5. Rome Circuit

Game: Gran Turismo 3

Polyphony outdid themselves with this circuit. Tricky when it needs to be (watch as the road tightens up after certain turns), but still easy to cruise, Rome Circuit carved out a track in the Italian city that looked as good as it was to drive. You know what they say: when in Rome, try not to drive into the Trevi Fountain.

4. LA Freeway

Game: Cruis'n USA

Year: 1994

This is the one video game track I am sure everyone—and maybe even their fathers and mothers—has played. If you lost your composure on the many straightaways, you could be sure to have the front of your car kiss a palm tree (thankfully, there was no damage feature). If you haven't played this course, take your ass down to your local Dave & Buster's and get on it. 16 years later, it's like a hot tub time machine!

3. Banshee Boardwalk

Game: Mario Kart 64

Year: 1997

Dark, gloomy, dangerous—it's everything Mario Kart isn't. And that's why I love it. Yeah, the turns are hard to maneuver, and sure, some of the roadways are too narrow for the whole field. You know what? Life is unfair sometimes. Deal with it.

2. Ice Arena

Game: Gran Turismo 4

Year: 2005

Wait—I can take my cars and race... on ICE? OH HELL YES. Want to perform some real hoonery? Take your 600hp racer out on this track and watch the back kick out before you crash into a wall.

1. Bowser's Castle

Game: Super Mario Kart

Year: 1992

Yep, this is it. Bowser's Castle. The most sinister-looking track on this list. The spot where you could fall and burn to death if you handled an apex wrong. Yeah, it's only Super Mario Kart, and it's not as intricate or as detailed as other tracks and games, but this track struck more fear into our widdle hearts than any other I can think of. That's what

racing's about: pushing through the fear. LOLZ! Nah, seriously, I can't think of a more fun game than SMK, and this was—and is—my favorite track from the game. Bong.

NDS Lite (2011-12-01 20:41:03)

I having few racing games because i love the most Fighting and adventure games. But i am still playing NFS series with my friends as multi player. Nice to see best racing games list here.

Greatest Superheroes (2011-11-26 19:58)

20. Dr. Doom (Fantastic 4)
19. Hunter Rose
18. Captain America
17. Wonder Woman
16. The Punisher
15. Iron Man
14. Rorschach (Watchmen)
- 13 Death (Sandman)
12. The Hulk
11. Jesse Custer (Preacher)
10. The Thing (Fantastic 4)
9. Magneto (Xmen)
8. The Joker (batman)
7. Judge Dredd
6. Dream ((Vertigo)
5. Spiderman
4. Wolverine
3. John Constantine (Hellblazer)
2. Batman
1. Superman (but he should be #30 here)

Today, I bought my first comic paperbacks and hardcover. Xmen Days of Futures Past, the Dark Knight Returns and The Killing Joke. I'll probably stop right there, because comics are defunct.

Facebook bureaucracy collectivism (2011-11-29 16:27)

Now, People just report abuse just by me adding them to the friend list without me saying anything at all. It's corruption is what it is! Got the Facebook bureaucracy going here; its bureaucracy collectivism/monarchy. The elites are always elite getting ever popular. I alerted security, but it doesn't bother. That's what is stupid about it. Pretty much this

Anonymous (2013-09-13 03:01:56)

Additionally the large free email services began screening for viruses on uploaded files and incoming files, which really cut down the simplicity of sending out viruses in mass. But starting from your random seed offers you access to 18 quintillion possible sides.

Net - Stumbler (also known as Network Stumbler) is a tool for Windows that facilitates detection of Wireless LANs using the 802.

NIKE Missile Base MSP-20 (2011-12-08 10:01)

IFRAME: <http://www.youtube.com/embed/FWQ5OcKdK-U?fs=1>

The nike base MS-20 in Roberts, Wisconsin was for Soviets and aliens!

IFRAME: <http://www.youtube.com/embed/mWLp8nQw1TI?fs=1>

Game Industry done it to themselves! (2011-12-10 02:27)

I read how the game industry is failing, but that is very elementary and annoyingly obvious. Consoles have five year cycles since Atari 2600. This generation, consoles have seven year cycles so blame Microsoft for delaying Xbox Loop

24 months later and Nintendo for delaying their consoles 12 months and Sony 24 months! I am sick of the old OpenGL 2 / DirectX 9 games that existed eight years ago.

Everybody should be playing on DirectX 11 / Open GL 4 consoles for a full year. I played Crysis 2 in DirectX 11 with a Radeon HD 5970 since 2010. I give Crysis 2 a 8.5. The difference is tessellation polygons. Xbox 360 doesn't do tessellation or Shader Model 5. Tessellation is the process of creating a two-dimensional plane using the repetition of a geometric shape with no overlaps and no gaps. Manufacturers should've brought out consoles in 2011 and 3DS in 2010. I wouldn't care paying \$500 for Xbox Loop or \$300 for Wii U in 2011. I am buying videogames, because other electronic stuff being sold offline is stupid (Cds, DVDs, radios, phones, Blurays, iPads, iPods, lesser known gimmicky media players).

I think that PS Universe (British Site) is regressing due the 24 months added to the era. Alexa reviews say the Playstation Universe's forums have regressed since their 2009 (when I left). Playstation Universe is the largest independent Playstation forum. Playstation is better than Xbox IMHO.

N64 -> Dreamcast 1.2 years

PS2 -> Xbox 360 3 years

Xbox 360 -> Wii U six years

PS3 -> PS4 seven years

DS -> 3DS seven years

Everybody's getting a gun for Xmas (2011-12-10 18:07)

I read this townhall article where guns (handguns in particular) are the most popular 2011 Christmas gift due to cartels I guess. The Beretta M9 was picked, because the military could afford the parts which obviously the Secret Service knows better than anyone. I think the secret service has the smartest officers.

My pick would be the FN Five-Seven, because it isn't like I'm using 20 rounds of ammo. It's easy to aim, its amongst the most reliable.

Operation: Delayed blowback autoloader

Caliber: 5.7x28mm

Barrel Length: 4.8 inches

Overall Length: 8.2 inches

Weight, empty 1.3 pounds

Safety: Ambidextrous, located above trigger

Sights: Fully adjustable rear, blade front

Stocks: Integral polymer frame

Magazine Capacity: 20 rounds

Finish: Matte black

Price: \$1074

FN developed two systems to utilize the new 5.7x28mm cartridge: the P90 PDW and the Five-sevenN service pistol. Both are modern designs manufactured from space-age corrosion-resistant materials. The P90 is a unique-looking compact submachinegun that feeds from a horizontally mounted 50-round magazine. The companion of the P90 is the Five-sevenN. It is a full-size service pistol that operates via delayed blowback. I had a chance to shoot both the P90 and Five-sevenN pistol on the company's outdoor range, but I was looking to spend more time with the Five-sevenN than was possible in a mere demonstration.

The model I received was FN's Five-sevenN USG. It came in a black plastic hard case with a cleaning kit, tools, lock, and two spare 20-round magazines. A full-size service pistol with a look all its own, the USG is built on a lightweight polymer frame. Quite out of the ordinary, though, is that the slide, which houses a 4.8-inch hard-chromed barrel, also has a polymer shell. Due to the amount of polymer utilized in its construction the USG, despite its size, is relatively light, just 1.3 pounds unloaded. My sample gun weighed 1.6 pounds loaded. Overall length is 8.2 inches, and it's approximately 5.75 inches high.

(From left to right) 5.56, 5.7x28mm SS190, 9x19, .224 BOZ, 7.62x25mm Sabot, 7.62x25mm, 5.45x18mm Soviet, 5.7x28mm SS190, 5.7x28mm SS195 LF.

the slide release is located just forward of where the safety is mounted on a 1911. This allows it to be easily depressed without having to stretch for it. Ambidextrous safety levers are mounted on both sides of the frame just above the trigger.

While this is an unusual place for a safety on a handgun, modern pistol handling doctrine calls for placing your trigger finger alongside the frame when not actually firing. This puts it right over the USG's safety lever allowing it to be easily manipulated. To facilitate use with gloves the trigger guard is slightly oversized at the front. A takedown lever is located on the left-hand side of the pistol's frame, allowing it to be easily stripped without tools. To show the state of the firearm, a loaded chamber indicator is mounted to the left rear of the ejection port.

The frame of the pistol is nicely contoured and textured to provide a comfortable yet secure grip. To make the design more flexible and user friendly, the dustcover features a MIL-STD 1913 rail, which allows lights and lasers to be easily mounted. Feed is from synthetic magazines that hold a whopping 20 rounds. A magazine disconnect is incorporated into the design, but the good news is that it does not degrade the quality of the trigger. Somewhat surprisingly, the trigger on the USG is quite good, being both light and crisp with a very short reset.

. With a 20-round magazine I expected the USG's frame to be fat and bulky. Pawing it over I was pleasantly surprised to find it quite comfortable. Magazines inserted easily, the slide retracted smoothly, and the small bottleneck rounds fed readily into the chamber. The safety took a bit to get used to, simply because I was unaccustomed to its location, but I have no negative comments about it. The ammunition I had on hand for testing was a large quantity of FN's 28-grain JHP load. I set to work making empty brass.

I began testing by checking the Five-seveN's accuracy from the bench at 25 yards. I fired four five-shot groups off of sandbags, and the average group size came in at two inches. Velocity of 10 rounds averaged 1951 fps, which is a good bit lower than FN's claim. Impressed by its 25-yard accuracy, I placed a target at 50 yards and repeated my testing. At this distance the Five-seveN averaged four-inch groups and is probably capable of doing better. Recoil is very mild. The muzzle simply flips slightly and then settles back into place. It's a very pleasant pistol to shoot.

While the Five-seveN USG pistol's push-button magazine release is conventionally located, its slide release, ambidextrous safeties, and takedown lever are positioned differently than the norm.

From the bench I moved to running drills from a holster. For gear I selected a holster and magazine carriers from Blade-Tech, Dept. ST, 2506 104th St. Court S., Suite A, Lakewood, WA 98499; 253-581-4347; www.blade-tech.com. I've always had good luck with Blade-Tech gear, and it did not let me down this time. Starting at the two-yard line and working my way back to the 15-yard line, I ran various drills, including shooting strong-handed, weak-handed, and with both hands—stationary and on the move with plenty of forced reloads and failure drills.

Thanks to the excellent trigger, light recoil, mild muzzle flip, and bottomless magazine you can blister targets at a rapid rate. Lock into it and the slide simply pistons back and forth as empties fly out. When the magazine finally runs dry, punch the release and it's kicked clear. Slap another one home, hit the slide release, and keep going. Practical accuracy is excellent, and man-sized targets are easy to hit, even at 100 yards.

I like it! It's accurate, reliable, and easy to shoot well. Plus, it's an awful lot of fun to shoot, especially with that deep 20-round magazine capacity. My wife Emily put her Nikon up for a bit and took a turn behind it. She liked it, too. For me, a firearm simply being fun to shoot, whether it's an M1886 Lebel or FN's USG, is reason enough to own it.

many vocal detractors in the U.S. doubt that this small cartridge and its ultralightweight 28- or 40-grain bullets provide adequate terminal performance. Highly respected experts, such as Dr. Gary K. Roberts, have stated current 5.7x28mm loads do not offer sufficient penetration or inflict a large enough permanent wound cavity based upon testing in ordnance gelatin. A 28-grain nonexpanding .224-inch-diameter bullet at 1950 fps is certainly no magnum. Despite this, FN stands firmly behind the 5.7x28mm and states it has worked well when employed by military/law enforcement personnel in actual shootings.

Xbox Loop and Wii U in 2012 (2011-12-12 16:45)

I hear the codename is Xbox Loop (for Xbox 720) and it will feature a ARM cPU.
six-core CPU and Crossfire GPU
2GB of GDDR3

Packers outperformed Dow (2011-12-12 23:56)

Green Bay became the first team in the NFL to become a publicly-owned franchise when it initially offered shares in 1923 to help keep the team afloat. Back then, the team sold a few hundred shares for \$5 each. Last week, the team held another stock sale, handing out 185,000 shares at \$250 a pop in the first 48 hours. Green Bay's goal is to eventually sell 250,000 shares.

The recent stock sale is part of an effort to raise US \$143-million in order to help renovate the team's Lambeau Field stadium. Renovations are expected to add two new gates, as well as about 6,700 seats and a new video board.

Pulsed Energy Projectile (2011-12-13 07:51)

PASS can create plasma in mid-air by focusing to a point.

These systems would be portable and lightweight; the battery operated solid state laser system would be comparable in size to the Armbrust and Dragon anti-tank systems, The man-portable... weapons system is expected to be lethal in the range of 1-5 miles, due to the fact that no sharp focusing of the laser beam is required. Therefore, it is capable of engaging both short and long ranged targets of any kind, greatly increasing the engagement area of current assault rifles.

They may also be able to create significant electro-magnetic pulse effects, and there has been work on tuning these to stun or paralyze humans.

LXDE faster than WinXP on 2001 PC (2011-12-15 14:51)

I know that KDE 4.7.2 and Gnome 3.2 were sluggish on the 2001 Compaq Presario with 512 MB of DDR, 128 MB video RAM, Athlon XP 2100, 40 GB 5200 RPM HDD.

LXDE 0.5.8 is only using 180 MB on the 3.1 kernel at beginning of LXDE desktop shell and I opened all the gnome, kde, and XFCE programs thru it. The resolution is 1280x1024. LibreOffice 3.4.2 only uses 38 MB of memory. Firefox 7.0.1 uses 140 MB, VLC uses 30 MB. With all those open, I was using 400 MB RAM

openSUSE 12.1 with XLDE selected is the best option. There is a LXDE BSD distro. "PC-BSD LXDE" would beat openSUSE in stability and security (newer UNIXs can kick the snot out of Linux). The PC BSD KDE distro uses 1 GB RAM at start up; therefore, "PC-BSD LXDE" would use almost twice Linux kernel memory.

To sum it up, Windows XP SP2 at 1280x768 with 32-bit color has slow periods on a 10 year old PC. EXT4 is more speedy than NTFS. LXDE is more speedy at 1280x1024 16-bit color on 2001 PC. If I download the nVidia driver, LXDE can be faster still.

Game of the Year 2011 (2011-12-17 03:59)

10. The ICO & Shadow of the Colossus Collection 9. Gears of War 3 8. Uncharted 3: Drake's Deception 7. LittleBigPlanet 2 6. Mass Effect 2 5. The Legend of Zelda: Skyward Sword 4. The Legend of Zelda: Ocarina of Time 3D 3. The Elder Scrolls V: Skyrim 2. Portal 2 1. Batman: Arkham City (as stated in my review) The new Metal Gear Rising screens look awesome!

Elder Scrolls V (2011-12-17 13:31)

I have my ESIV character in 2006

The Laffer Curve brilliant? (2011-12-20 07:50)

The story of how the Laffer Curve got its name begins with a 1978 article by Jude Wanniski in *The Public Interest* entitled, "Taxes, Revenues, and the 'Laffer Curve.'" ¹ As recounted by Wanniski (associate editor of *The Wall Street Journal* at the time), in December 1974, he had dinner with me (then professor at the University of Chicago), Donald Rumsfeld (Chief of Staff to President Gerald Ford), and Dick Cheney (Rumsfeld's deputy and my former classmate at Yale) at the Two Continents Restaurant at the Washington Hotel in Washington, D.C. While discussing President Ford's "WIN" (Whip Inflation Now) proposal for tax increases, I supposedly grabbed my napkin and a pen and sketched a curve on the napkin illustrating the trade-off between tax rates and tax revenues. Wanniski named the trade-off "The Laffer Curve."

I personally do not remember the details of that evening, but Wanniski's version could well be true. I used the so-called Laffer Curve all the time in my classes and with anyone else who would listen to me to illustrate the trade-off between tax rates and tax revenues. My only question about Wanniski's version of the story is that the restaurant used cloth napkins and my mother had raised me not to desecrate nice things.

The Historical Origins of the Laffer Curve

The Laffer Curve, by the way, was not invented by me. For example, Ibn Khaldun, a 14th century Muslim philosopher, wrote in his work *The Muqaddimah*: "It should be known that at the beginning of the dynasty, taxation yields a large revenue from small assessments. At the end of the dynasty, taxation yields a small revenue from large assessments." A more recent version (of incredible clarity) was written by John Maynard Keynes:

When, on the contrary, I show, a little elaborately, as in the ensuing chapter, that to create wealth will increase the national income and that a large proportion of any increase in the national income will ac-

crue to an Exchequer, amongst whose largest outgoings is the payment of incomes to those who are unemployed and whose receipts are a proportion of the incomes of those who are occupied...

Nor should the argument seem strange that taxation may be so high as to defeat its object, and that, given sufficient time to gather the fruits, a reduction of taxation will run a better chance than an increase of balancing the budget. For to take the opposite view today is to resemble a manufacturer who, running at a loss, decides to raise his price, and when his declining sales increase the loss, wrapping himself in the rectitude of plain arithmetic, decides that prudence requires him to raise the price still more—and who, when at last his account is balanced with nought on both sides, is still found righteously declaring that it would have been the act of a gambler to reduce the price when you were already making a loss.²

Theory Basics

The basic idea behind the relationship between tax rates and tax revenues is that changes in tax rates have two effects on revenues: the arithmetic effect and the economic effect. The arithmetic effect is simply that if tax rates are lowered, tax revenues (per dollar of tax base) will be lowered by the amount of the decrease in the rate. The reverse is true for an increase in tax rates. The economic effect, however, recognizes the positive impact that lower tax rates have on work, output, and employment—and thereby the tax base—by providing incentives to increase these activities. Raising tax rates has the opposite economic effect by penalizing participation in the taxed activities. The arithmetic effect always works in the opposite direction from the economic effect. Therefore, when the economic and the arithmetic effects of tax-rate changes are combined, the consequences of the change in tax rates on total tax revenues are no longer quite so obvious.

Figure 1 is a graphic illustration of the concept of the Laffer Curve—not the exact levels of taxation corresponding to specific levels of revenues. At a tax rate of 0 percent, the government would collect no tax revenues, no matter how large the tax base. Likewise, at a tax rate of 100 percent, the government would also collect no tax revenues because no one would willingly work for an after-tax wage of zero (i.e., there would be no tax base). Between these two extremes there are two tax rates that will collect the same amount of revenue: a high tax rate on a small tax base and a low tax rate on a large tax base.

The Laffer Curve itself does not say whether a tax cut will raise or lower revenues. Revenue responses to a tax rate change will depend upon the tax system in place, the time period being considered, the ease of movement into underground activities, the level of tax rates already in place, the prevalence of legal and accounting-driven tax loopholes, and the proclivities of the productive factors. If the existing tax rate is too high—in the "prohibitive range" shown above—then a tax-rate cut would result in increased tax revenues. The economic effect of the tax cut would outweigh the arithmetic effect of the tax cut.

Moving from total tax revenues to budgets, there is one expenditure effect in addition to the two effects that tax-rate changes have on revenues. Because tax cuts create an incentive to increase output, employment, and production, they also help balance the budget by reducing means-tested government expenditures. A faster-growing economy means lower unemployment and higher incomes, resulting in reduced unemployment benefits and other social welfare programs.

Over the past 100 years, there have been three major periods of tax-rate cuts in the U.S.: the Harding-Coolidge cuts of the mid-1920s; the Kennedy cuts of the mid-1960s; and the Reagan cuts of the early 1980s. Each of these periods of tax cuts was remarkably successful as measured by virtually any public policy metric.

Prior to discussing and measuring these three major periods of U.S. tax cuts, three critical points should be made regarding the size, timing, and location of tax cuts.

Size of Tax Cuts People do not work, consume, or invest to pay taxes. They work and invest to earn after-tax income,

and they consume to get the best buys after tax. Therefore, people are not concerned per se with taxes, but with after-tax results. Taxes and after-tax results are very similar, but have crucial differences.

Using the Kennedy tax cuts of the mid-1960s as our example, it is easy to show that identical percentage tax cuts, when and where tax rates are high, are far larger than when and where tax rates are low. When President John F. Kennedy took office in 1961, the highest federal marginal tax rate was 91 percent and the lowest was 20 percent. By earning \$1.00 pretax, the highest-bracket income earner would receive \$0.09 after tax (the incentive), while the lowest-bracket income earner would receive \$0.80 after tax. These after-tax earnings were the relative after-tax incentives to earn the same amount (\$1.00) pretax.

By 1965, after the Kennedy tax cuts were fully effective, the highest federal marginal tax rate had been lowered to 70 percent (a drop of 23 percent—or 21 percentage points on a base of 91 percent) and the lowest tax rate was dropped to 14 percent (30 percent lower). Thus, by earning \$1.00 pretax, a person in the highest tax bracket would receive \$0.30 after tax, or a 233 percent increase from the \$0.09 after-tax earned when the tax rate was 91 percent. A person in the lowest tax bracket would receive \$0.86 after tax or a 7.5 percent increase from the \$0.80 earned when the tax rate was 20 percent.

Putting this all together, the increase in incentives in the highest tax bracket was a whopping 233 percent for a 23 percent cut in tax rates (a ten-to-one benefit/cost ratio) while the increase in incentives in the lowest tax bracket was a mere 7.5 percent for a 30 percent cut in rates—a one-to-four benefit/cost ratio. The lessons here are simple: The higher tax rates are, the greater will be the economic (supply-side) impact of a given percentage reduction in tax rates. Likewise, under a progressive tax structure, an equal across-the-board percentage reduction in tax rates should have its greatest impact in the highest tax bracket and its least impact in the lowest tax bracket.

Timing of Tax CutsThe second, and equally important, concept of tax cuts concerns the timing of those cuts. In their quest to earn after-tax income, people can change not only how much they work, but when they work, when they invest, and when they spend. Lower expected tax rates in the future will reduce taxable economic activity in the present as people try to shift activity out of the relatively higher-taxed present into the relatively lower-taxed future. People tend not to shop at a store a week before that store has its well-advertised discount sale. Likewise, in the periods before legislated tax cuts take effect, people will defer income and then realize that income when tax rates have fallen to their fullest extent. It has always amazed me how tax cuts do not work until they actually take effect. When assessing the impact of tax legislation, it is imperative to start the measurement of the tax-cut period after all the tax cuts have been put into effect. As will be obvious when we look at the three major tax-cut periods—and even more so when we look at capital gains tax cuts—timing is essential.

Location of Tax CutsAs a final point, people can also choose where they earn their after-tax income, where they invest their money, and where they spend their money. Regional and country differences in various tax rates matter.

The Harding-Coolidge Tax Cuts

In 1913, the federal progressive income tax was put into place with a top marginal rate of 7 percent. Thanks in part to World War I, this tax rate was quickly increased significantly and peaked at 77 percent in 1918. Then, through a series of tax-rate reductions, the Harding-Coolidge tax cuts dropped the top personal marginal income tax rate to 25 percent in 1925. (See Figure 2.)

Although tax collection data for the National Income and Product Accounts (from the U.S. Bureau of Economic Analysis) do not exist for the 1920s, we do have total federal receipts from the U.S. budget tables. During the four years prior to 1925 (the year that the tax cut was fully implemented), inflation-adjusted revenues declined by an average of 9.2 percent per year (See Table 1). Over the four years following the tax-rate cuts, revenues remained volatile but averaged an inflation-adjusted gain of 0.1 percent per year. The economy responded strongly to the tax cuts, with output nearly doubling and unemployment falling sharply.

In the 1920s, tax rates on the highest-income brackets were reduced the most, which is exactly what economic theory suggests should be done to spur the economy.

Furthermore, those income classes with lower tax rates were not left out in the cold: The Harding–Coolidge tax-rate cuts reduced effective tax rates on lower-income brackets. Internal Revenue Service data show that the dramatic tax cuts of the 1920s resulted in an increase in the share of total income taxes paid by those making more than \$100,000 per year from 29.9 percent in 1920 to 62.2 percent in 1929 (See Table 2). This increase is particularly significant given that the 1920s was a decade of falling prices, and therefore a \$100,000 threshold in 1929 corresponds to a higher real income threshold than \$100,000 did in 1920. The consumer price index fell a combined 14.5 percent from 1920 to 1929. In this case, the effects of bracket creep that existed prior to the federal income tax brackets being indexed for inflation (in 1985) worked in the opposite direction.

Table 2

B 1765

Percentage Share of Total Income Taxes Paid by Income Class: 1920, 1925, and 1929

Income Class	1920	1925	1929
Under \$5,000	15.4%	1.9%	0.4%
\$5,000-\$10,000	9.1%	2.6%	0.9%
\$10,000-\$25,000	16.0%	10.1%	5.2%
\$25,000-\$100,000	29.6%	36.6%	27.4%
Over \$100,000	29.9%	48.8%	62.2%

Source: Internal Revenue Service.

Perhaps most illustrative of the power of the Harding-Coolidge tax cuts was the increase in gross domestic product (GDP), the fall in unemployment, and the improvement in the average American's quality of life during this decade. Table 3 demonstrates the remarkable increase in American quality of life as reflected by the percentage of Americans owning items in 1930 that previously had only been owned by the wealthy (or by no one at all).

Table 3 B 1765

Percentage of Americans Owning Selected Items

Item	1920	1930
Autos	26%	60%
Radios	0%	46%
Electric lighting	35%	68%
Washing machines	8%	24%
Vacuum cleaners	9%	30%
Flush toilets	20%	51%

The Kennedy Tax Cuts

During the Depression and World War II, the top marginal income tax rate rose steadily, peaking at an incredible 94 percent in 1944 and 1945. The rate remained above 90 percent well into President John F. Kennedy's term. Kennedy's fiscal policy stance made it clear that he believed in pro-growth, supply-side tax measures:

Tax reduction thus sets off a process that can bring gains for everyone, gains won by marshalling resources that would otherwise stand idle—workers without jobs and farm and factory capacity without markets. Yet many taxpayers seemed prepared to deny the nation the fruits of tax reduction because they question the financial soundness of reducing taxes when the federal budget is already in deficit. Let me make clear why, in today's economy, fiscal prudence and responsibility call for tax reduction even if it temporarily enlarged the federal deficit—why reducing taxes is the best way open to us to increase revenues.³

Kennedy reiterated his beliefs in his Tax Message to Congress on January 24, 1963:

In short, this tax program will increase our wealth far more than it increases our public debt. The actual burden of that debt—as measured in relation to our total output—will decline. To continue to increase our debt as a result of inadequate earnings is a sign of weakness. But to borrow prudently in order to invest in a tax revision that will greatly increase our earning power can be a source of strength.

President Kennedy proposed massive tax-rate reductions, which were passed by Congress and became law after he was assassinated. The 1964 tax cut reduced the top marginal personal income tax rate from 91 percent to 70 percent by 1965. The cut reduced lower-bracket rates as well. In the four years prior to the 1965 tax-rate cuts, federal government income tax revenue—adjusted for inflation—increased at an average annual rate of 2.1 percent, while

total government income tax revenue (federal plus state and local) increased by 2.6 percent per year (See Table 4). In the four years following the tax cut, federal government income tax revenue increased by 8.6 percent annually and total government income tax revenue increased by 9.0 percent annually. Government income tax revenue not only increased in the years following the tax cut, it increased at a much faster rate.

The Kennedy tax cut set the example that President Ronald Reagan would follow some 17 years later. By increasing incentives to work, produce, and invest, real GDP growth increased in the years following the tax cuts: More people worked, and the tax base expanded. Additionally, the expenditure side of the budget benefited as well because the unemployment rate was significantly reduced.

Using the Congressional Budget Office's revenue forecasts (made with the full knowledge of the future tax cuts), revenues came in much higher than had been anticipated, even after the "cost" of the tax cut had been taken into account (See Table 5).

Table 5 B 1765

Actual vs. Forecasted Federal Budget Receipts, 1964-1967 (in \$billions)

Fiscal Year	Actual Budget Receipts	Forecasted Budget Receipts	Difference	Percentage Actual Revenue Exceeded Forecasts
1964	\$112.7	\$109.3	+\$3.4	3.1%
1965	\$116.8	\$115.9	+\$0.9	0.7%
1966	\$130.9	\$119.8	+\$11.1	9.3%
1967	\$149.6	\$141.4	+\$8.2	5.8%

Source: Congressional Budget Office, *A Review of the Accuracy of Treasury Revenue Forecasts, 1963-1978*, February 1981, p. 4.

Additionally, in 1965—one year following the tax cut—personal income tax revenue data exceeded expectations by the greatest amounts in the highest income classes (See Table 6).

Table 6 B 1765

Actual vs. Forecasted Personal Income Tax Revenue by Income Class, 1965 (calendar year, revenue in \$millions)

Adjusted Gross Income Class	Actual Revenue Collected	Forecasted Revenue	Percentage Actual Revenue Exceeded Forecasts
\$0 - \$5,000	\$4,337	\$4,374	-0.8%
\$5,000 - \$10,000	\$15,434	\$13,213	16.8%
\$10,000 - \$15,000	\$10,711	\$6,845	56.5%
\$15,000 - \$20,000	\$4,188	\$2,474	69.3%
\$20,000 - \$50,000	\$7,440	\$5,104	45.8%
\$50,000 - \$100,000	\$3,654	\$2,311	58.1%
\$100,000+	\$3,764	\$2,086	80.4%
Total	\$49,530	\$36,407	36.0%

Source: Estimated revenues calculated from Joseph A. Pechman, "Evaluation of Recent Tax Legislation: Individual Income Tax Provisions of the Revenue Act of 1964," *Journal of Finance*, Vol. 20 (May 1965), p. 268. Actual revenues are from Internal Revenue Service, *Statistics of Income—1965, Individual Income Tax Returns*, p. 6.

Testifying before Congress in 1977, Walter Heller, President Kennedy's Chairman of the Council of Economic Advisers, summarized:

What happened to the tax cut in 1965 is difficult to pin down, but insofar as we are able to isolate it, it did seem to have a tremendously stimulative effect, a multiplied effect on the economy. It was the major factor that led to our running a \$3 billion surplus by the middle of 1965 before escalation in Vietnam struck us. It was a \$12 billion tax cut, which would be about \$33 or \$34 billion in today's terms, and within one year the revenues into the Federal Treasury were already above what they had been before the tax cut.

Did the tax cut pay for itself in increased revenues? I think the evidence is very strong that it did.⁴

The Reagan Tax Cuts

In August 1981, President Reagan signed into law the Economic Recovery Tax Act (ERTA, also known as the Kemp-Roth Tax Cut). The ERTA slashed marginal earned income tax rates by 25 percent across the board over a three-year period. The highest marginal tax rate on unearned income dropped to 50 percent from 70 percent (as a result of the Broadhead Amendment), and the tax rate on capital gains also fell immediately from 28 percent to 20 percent. Five percentage points of the 25 percent cut went into effect on October 1, 1981. An additional 10 percentage points of the cut then went into effect on July 1, 1982. The final 10 percentage points of the cut began on July 1, 1983. Looking at the cumulative effects of the ERTA in terms of tax (calendar) years, the tax cut reduced tax rates by 1.25 percent through the entirety of 1981, 10 percent through 1982, 20 percent through 1983, and the full 25 percent through 1984.

A provision of ERTA also ensured that tax brackets were indexed for inflation beginning in 1985.

To properly discern the effects of the tax-rate cuts on the economy, I use the starting date of January 1, 1983—when the bulk of the cuts were already in place. However, a case could be made for a starting date of January 1, 1984—when the full cut was in effect.

These across-the-board marginal tax-rate cuts resulted in higher incentives to work, produce, and invest, and the economy responded (See Table 7). Between 1978 and 1982, the economy grew at a 0.9 percent annual rate in real terms, but from 1983 to 1986 this annual growth rate increased to 4.8 percent.

Prior to the tax cut, the economy was choking on high inflation, high Interest rates, and high unemployment. All three of these economic bellwethers dropped sharply after the tax cuts. The unemployment rate, which peaked at 9.7 percent in 1982, began a steady decline, reaching 7.0 percent by 1986 and 5.3 percent when Reagan left office in January 1989.

Inflation-adjusted revenue growth dramatically improved. Over the four years prior to 1983, federal income tax revenue declined at an average rate of 2.8 percent per year, and total government income tax revenue declined at an annual rate of 2.6 percent. Between 1983 and 1986, federal income tax revenue increased by 2.7 percent annually, and total government income tax revenue increased by 3.5 percent annually.

The most controversial portion of Reagan's tax revolution was reducing the highest marginal income tax rate from 70 percent (when he took office in 1981) to 28 percent in 1988. However, Internal Revenue Service data reveal that tax collections from the wealthy, as measured by personal income taxes paid by top percentile earners, increased between 1980 and 1988—despite significantly lower tax rates (See Table 8).

Table 8

B-1765

Percentage of Total Personal Income Taxes Paid by Percentile of Adjusted Gross Income (AGI)

Calendar Year	Top 1% of AGI	Top 5% of AGI	Top 10% of AGI	Top 25% of AGI	Top 50% of AGI
1980	19.1%	36.8%	49.3%	73.0%	93.0%
1981	17.6%	35.1%	48.0%	72.3%	92.6%
1982	19.0%	36.1%	48.6%	72.5%	92.7%
1983	20.3%	37.3%	49.7%	73.1%	92.8%
1984	21.1%	38.0%	50.6%	73.5%	92.7%
1985	21.8%	38.8%	51.5%	74.1%	92.8%
1986	25.0%	41.8%	54.0%	75.6%	93.4%
1987	24.6%	43.1%	55.5%	76.8%	93.9%
1988	27.5%	45.5%	57.2%	77.8%	94.3%

The Laffer Curve and the Capital Gains Tax

Changes in the capital gains maximum tax rate provide a unique opportunity to study the effects of taxation on taxpayer behavior. Taxation of capital gains is different from taxation of most other sources of income because people have more control over the timing of the realization of capital gains (i.e., when the gains are actually taxed). The historical data on changes in the capital gains tax rate show an incredibly consistent pattern. Just after a capital gains tax-rate cut, there is a surge in revenues: Just after a capital gains tax-rate increase, revenues take a dive. As would also be expected, just before a capital gains tax-rate cut there is a sharp decline in revenues: Just before a tax-rate increase there is an increase in revenues. Timing really does matter.

This all makes total sense. If an investor could choose when to realize capital gains for tax purposes, the investor would clearly realize capital gains before tax rates are raised. No one wants to pay higher taxes.

In the 1960s and 1970s, capital gains tax receipts averaged around 0.4 percent of GDP, with a nice surge in the mid-1960s following President Kennedy's tax cuts and another surge in 1978-1979 after the Steiger-Hansen capital gains tax-cut legislation went into effect (See Figure 3).

Following the 1981 capital gains cut from 28 percent to 20 percent, capital gains revenues leapt from \$12.5 billion in 1980 to \$18.7 billion by 1983—a 50 percent increase—and rose to approximately 0.6 percent of GDP. Reducing income and capital gains tax rates in 1981 helped to launch what we now appreciate as the greatest and longest period of wealth creation in world history. In 1981, the stock market bottomed out at about 1,000—compared to nearly 10,000 today (See Figure 4).

As expected, increasing the capital gains tax rate from 20 percent to 28 percent in 1986 led to a surge in revenues prior to the increase (\$328 billion in 1986) and a collapse in revenues after the increase took effect (\$112 billion in 1991).

Reducing the capital gains tax rate from 28 percent back to 20 percent in 1997 was an unqualified success, and every claim made by the critics was wrong. The tax cut, which went into effect in May 1997, increased asset values and contributed to the largest gain in productivity and private sector capital investment in a decade. It did not lose revenue for the federal Treasury.

In 1996, the year before the tax rate cut and the last year with the 28 percent rate, total taxes paid on assets sold was \$66.4 billion (Table 9). A year later, tax receipts jumped to \$79.3 billion, and in 1998, they jumped again to \$89.1 billion. The capital gains tax-rate reduction played a big part in the 91 percent increase in tax receipts collected from capital gains between 1996 and 2000—a percentage far greater than even the most ardent supply-siders expected.

Table 9 CDA 04-08

Number of Currently Exempt and Non-exempt White-Collar Salaried Workers

Category	Count	%
Non-exempt, Less Than \$155 per Week	802,097	2.53
Non-exempt, \$155 to \$455 per Week	2,628,594	8.30
Exempt, \$155 to \$455 per Week	1,283,530	4.05
Non-exempt, \$455 to \$1,923 per Week	8,516,871	26.89
Exempt, \$455 to \$1,923 per Week	16,189,371	51.11
Non-exempt, More Than \$1,923 per Week	271,902	0.86
Exempt, More Than \$1,923 per Week	1,984,132	6.26
Total	31,676,497	100.00

Seldom in economics does real life conform so conveniently to theory as this capital gains example does to the Laffer Curve. Lower tax rates change people's economic behavior and stimulate economic growth, which can create more—not less—tax revenues.

The Story in the States

California My home state of California has an extremely progressive tax structure, which lends itself to Laffer Curve types of analyses.⁵ During periods of tax increases and economic slowdowns, the state's budget office almost always overestimates revenues because they fail to consider the economic feedback effects incorporated in the Laffer Curve analysis (the economic effect). Likewise, the state's budget office also underestimates revenues by wide margins during periods of tax cuts and economic expansion. The consistency and size of the misestimates are quite striking. Figure 5 demonstrates this effect by showing current-year and budget-year revenue forecasts taken from each year's January budget proposal and compared to actual revenues collected.

State Fiscal Crises of 2002-2003 The National Conference of State Legislatures (NCSL) conducts surveys of state fiscal conditions by contacting legislative fiscal directors from each state on a fairly regular basis. It is revealing to look at the NCSL survey of November 2002, at about the time when state fiscal conditions were hitting rock bottom. In the survey, each state's fiscal director reported his or her state's projected budget gap—the deficit between projected

revenues and projected expenditures for the coming year, which is used when hashing out a state's fiscal year (FY) 2003 budget. As of November 2002, 40 states reported that they faced a projected budget deficit, and eight states reported that they did not. Two states (Indiana and Kentucky) did not respond.

Figure 6 plots each state's budget gap (as a share of the state's general fund budget) versus a measure of the degree of taxation faced by taxpayers in each state (the "incentive rate"). This incentive rate is the value of one dollar of income after passing through the major state and local taxes. This measure takes into account the state's highest tax rates on corporate income, personal income, and sales.⁶ (These three taxes account for 73 percent of total state tax collections.)⁷

These data have all sorts of limitations. Each state has a unique budgeting process, and no one knows what assumptions were made when projecting revenues and expenditures. As California has repeatedly shown, budget projections change with the political tides and are often worth less than the paper on which they are printed. In addition, some states may have taken significant budget steps (such as cutting spending) prior to FY 2003 and eliminated problems

for FY 2003. Furthermore, each state has a unique reliance on various taxes, and the incentive rate does not factor in property taxes and a myriad of minor taxes.

Even with these limitations, FY 2003 was a unique period in state history, given the degree that the states—almost without exception—experienced budget difficulties. Thus, it provides a good opportunity for comparison. In Figure 6, states with high rates of taxation tended to have greater problems than states with lower tax rates. California, New Jersey, and New York—three large states with relatively high tax rates—were among those states with the largest budget gaps. In contrast, Florida and Texas—two large states with no personal income tax at all—somehow found themselves with relatively few fiscal problems when preparing their budgets.

Impact of Taxes on State Performance Over TimeOver the years, Laffer Associates has chronicled the relationship between tax rates and economic performance at the state level. This relationship is more fully explored in our research covering the Laffer Associates State Competitive Environment model.⁸ Table 10 demonstrates this relationship and reflects the importance of taxation—both the level of tax rates and changes in relative competitiveness due to changes in tax rates—on economic performance.

Combining each state's current incentive rate (the value of a dollar after passing through a state's major taxes) with the sum of each state's net legislated tax changes over the past 10 years (taken from our historical State Competitive Environment rankings) allows a composite ranking of which states have the best combination of low and/or falling taxes and which have the worst combination of high and/or rising taxes. Those states with the best combination made the top 10 of our rankings (1 = best), while those with the worst combination made the bottom 10 (50 = worst). Table 10 shows how the "10 Best States" and the "10 Worst States" have fared over the past 10 years in terms of income growth, employment growth, unemployment, and population growth. The 10 best states have outperformed the bottom 10 states in each category examined.

The 10 Worst States

¹ Ranking based on equal-weighted average of each state's incentive rank and net change in taxes rank.

² The incentive rate is the value of an after-tax dollar using the following weighting method: 80 percent of the value of a dollar after passing through the personal tax channel (personal and sales taxes) and 20 percent of the value of a dollar after passing through the corporate tax channel (corporate, personal, and sales taxes).

³ Equals the sum of Laffer Associates' relative tax burden rankings (change in legislated tax burden per \$1,000 of personal income relative to the U.S. change) over the 1994-2003 period. A negative number indicates decreasing in taxes; a positive number indicates increasing taxes.

⁴ November 1993 through November 2003 (Bureau of Economic Analysis).

⁵ November 1993 through November 2003 (Bureau of Labor Statistics).

⁶ As of November 2003 (Bureau of Labor Statistics).

⁷ July 1, 1993 through July 1, 2003 (U.S. Bureau of the Census).

Sources: Author's calculations using data from GCI Incorporated; U.S. Department of Commerce, Bureau of Economic Analysis; U.S. Department of Labor, Bureau of Labor Statistics; U.S. Bureau of the Census and the National Conference of State Legislatures.

Looking Globally

For all the brouhaha surrounding the Maastricht Treaty, budget deficits, and the like, it is revealing—to say the least—that G-12 countries with the highest tax rates have as many, if not more, fiscal problems (deficits) than the countries with lower tax rates (See Figure 7). While not shown here, examples such as Ireland (where tax rates were dramatically lowered and yet the budget moved into huge surplus) are fairly commonplace. Also not shown here, yet probably true, is that countries with the highest tax rates probably also have the highest unemployment rates. High tax rates certainly do not guarantee fiscal solvency.

Tax Trends in Other Countries: The Flat-Tax Fever

For many years, I have lobbied for implementing a flat tax, not only in California, but also for the entire U.S. Hong Kong adopted a flat tax ages ago and has performed like gangbusters ever since. Seeing a flat-tax fever seemingly infect Europe in recent years is truly exciting. In 1994, Estonia became the first European country to adopt a flat tax, and its 26 percent flat tax dramatically energized what had been a faltering economy. Before adopting the flat tax, Estonia had an impoverished economy that was literally shrinking—making the gains following the flat tax implementation even more impressive. In the eight years after 1994, Estonia sustained real economic growth averaging 5.2 percent per year.

Latvia followed Estonia's lead one year later with a 25 percent flat tax. In the five years before adopting the flat tax, Latvia's real GDP had shrunk by more than 50 percent. In the five years after adopting the flat tax, Latvia's real GDP has grown at an average annual rate of 3.8 percent (See Figure 8). Lithuania has followed with a 33 percent flat tax and has experienced similar positive results.

Russia has become one of the latest Eastern Bloc countries to institute a flat tax. Since the advent of the 13 percent flat personal tax (on January 1, 2001) and the 24 percent corporate tax (on January 1, 2002), the Russian economy has had amazing results. Tax revenue in Russia has increased dramatically (See Figure 9). The new Russian system is simple, fair, and much more rational and effective than what they previously used. An individual whose income is from wages only does not have to file an annual return. The employer deducts the tax from the employee's paycheck and transfers it to the Tax Authority every month.

Due largely to Russia's and other Eastern European countries' successes with flat tax reform, Ukraine and the Slovak Republic implemented their own 13 percent and 19 percent flat taxes, respectively, on January 1, 2004.

Arthur B. Laffer is the founder and chairman of Laffer Associates, an economic research and consulting firm. This paper was written and originally published by Laffer Associates. The author thanks Bruce Bartlett, whose paper "The Impact of Federal Tax Cuts on Growth" provided inspiration.

Acer Christmas (2011-12-25 13:34)

AMD A6-3400M at 2.3 GHz (4 cores)

AMD Radeon HD 6520G 512 MB GDDR3

6 GB DDR3

6 cell lithium ion

15.6"

500 GB SATA

openSUSE 12.1 (KDE 4.7.2, Gnome 3.2.1, XFCE 4.8.6, LXDE 0.5.8 / 3.1.2 kernel)

Windows 7

I get internal wifi in Windows 7. I don't get wifi in Linux, yet I installed broadcom linux drivers successfully via `sudo /usr/sbin/install_bcm43xx_firmware`. Hope fixed in openSUSE 12.2! Didn't have wifi drivers in PC-BSD 8.2

It has no 3D games, but a mirror of my 80 GB of mp3s, aotuv vorbis 5 and aac.

I bought an Asus USB103 today to fix Yast WIFI detection. The Zune 30 and a Creative Zen touch 20 GB are new, not Christmas presents. Zen touch is the greatest battery longevity, cheapest, 20 GB media player in history.

I got a couple of laptops to use, but this is my latest owned laptop.

How Boot PC-BSD 9 in GRUB

Legend of Zelda posters (2011-12-27 12:13)

There is this liberal person on facebook working at a game store which I envy once in a while, because he's closer to my status quo. I actually have money to copy his idea.

He bought at least 1 Legend of Zelda (Ocarina of Time 3D) poster for his room, and I stalemated him by buying posters of Ocarina of Time, Twilight Princess, Majoras Mask, Skyward Sword, Phantom Hourglass and hang them in my room.

I cannot let him get away with that popularity costing only \$15. Two can play at this game.

Whoever thinks this is silly, go to gamerankings.com and look up Ocarina of Time.

New Years (2012-01-02 00:18)

[EMBED]

Why the heck are the javascript slideshows popular and AVC Slideshows suck? I want to know! I used ProShow Gold, the premiere slideshow maker, because it was installed (only 30 MB executable). I was going to download 200 MB of Cyberlink Power Director 7 Ultra for editing when I get around to it. I have the cheesy music, because I don't get comments with my Metallica, Queen, Sasha, Led Zeppelin songs during my slideshow. I have 5 minute commentary. I thought they wanted to see every game clearly so a slideshow made sense for my last November video...

For the non-cheesy music version!

IFRAME: <http://www.youtube.com/embed/IAOeWcZEAzM?fs=1>

Users collect this on Gamespot. I'm not a cosplay type! I only watched 66 % of these once completely thru. The remaining 33 % I seen one of hour minimum of all these series. I watched all the war movies 100 % from start to finish at least once. I've seen Band of Brothers twice, Pacific once, The Longest Day at least 10 times, Winds of War once, War and Remembrance twice, Tora, Tora, Tora 10 times; The North and the South twice, The Blue and Gray once, and the rest of War movies at least once.

Russian Pak Da (2012-01-02 12:03)

The PAK DA is going to be heavily based on Russia's current supersonic bomber Tupolev Tu-160 and is expected to have its maiden flight by 2015. However it was also speculated that the PAK DA would be similar to the stealthy design of the America B-2 Spirit bomber. The PAK DA concept relies on the ability to fly at stratospheric altitudes (50,000 meters) with stealth features to avoid enemy air defenses.

The United States next generation bomber is going to be based on B2 Spirit, F-22 and F35 and is affordable. Although, I wish Northrop Gruman drop the F35 technology, because the F-35 Lightning II doesn't have any anti-gravity technology. B2 and F-22 have the anti-gravity technology.

Total program cost estimated at \$40 to \$50 billion

Fleet size of 175 aircraft, 120 for 10 combat squadrons plus 55 for training and reserves

Subsonic maximum speed

Range: 5,000+ nautical miles (9,260+ km)

"optionally manned" (for non-nuclear missions)

Total mission durations of 50 to 100 hours (when unmanned)

A weapons load of 14,000–28,000 lb (6,350–12,700 kg)

Ability to "survive daylight raids in heavily defended enemy territory"

Ability to carry nuclear weapon

Designed to use off-the-shelf propulsion, C4ISR, and radar technologies

Intelligence, surveillance, target acquisition, and reconnaissance along with command and control gear to enable the crew to direct other aircraft and forces.

The Wire complete series (2012-01-05 17:28)

At this time, I wanted the greatest TV show that ever existed so I looked online. IMDB gave The Wire a 9.6. I bought the complete series. It's on DirectTV channel 101. It said "The Wire" and it's cheap off Ebay so I bought it for \$60. I should have had it by now, but better really late than never.

Then I found I could also afford a new PSP 3000. The employee said it lasted 2 - 3 years, because that's what he heard on the streets. That's why there isn't any new PSP 1000s around. I needed a backup, because new ones will be hard to find after Vita comes out. PSVita comes out next month and I have money for it. I want Final Fantasy X HD the most.

Top 10 gangster films (2012-01-14 13:58)

10. The Untouchables

920s prohibition Chicago is corrupt from the judges downward. So in going up against Al Capone, Treasury agent Eliot Ness picks just two cops to help him and his accountant colleague. One is a sharp-shooting rookie, the other a seen-it-all beat man. The four of them are ready to battle Capone and his empire, but it could just be that guns are not the best way to get him.

9. The Departed

In South Boston, the state police force is waging war on Irish-American organized crime. Young undercover cop Billy Costigan is assigned to infiltrate the mob syndicate run by gangland chief Frank Costello. While Billy quickly gains Costello's confidence, Colin Sullivan, a hardened young criminal who has infiltrated the state police as an informer for the syndicate, is rising to a position of power in the Special Investigation Unit. Each man becomes deeply consumed

by his double life, gathering information about the plans and counter-plans of the operations he has penetrated. But when it becomes clear to both the mob and the police that there's a mole in their midst, Billy and Colin are suddenly in danger of being caught and exposed to the enemy-and each must race to uncover the identity of the other man in time to save himself. But is either willing to turn on the friends and comrades they've made during their long stints undercover?

8. Casino

his Martin Scorsese film depicts the Janus-like quality of Las Vegas—it has a glittering, glamorous face, as well as a brutal, cruel one. Ace Rothstein and Nicky Santoro, mobsters who move to Las Vegas to make their mark, live and work in this paradoxical world. Seen through their eyes, each as a foil to the other, the details of mob involvement in the casinos of the 1970s and '80s are revealed. Ace is the smooth operator of the Tangiers casino, while Nicky is his boyhood friend and tough strongman, robbing and shaking down the locals. However, they each have a tragic flaw—Ace falls in love with a hustler, Ginger, and Nicky falls into an ever-deepening spiral of drugs and violence.

7. Reservoir Dogs

They were six strangers, assembled to pull off the perfect crime: Mr. White, a professional criminal; Mr. Orange, a young newcomer; Mr. Blonde, a trigger-happy killer; Mr. Pink, a paranoid neurotic; Mr. Brown; and Mr. Blue. Hired by mob boss Joe Cabot and given fake names so no one could identify the others, they thought there was no way their heist could have failed. But after a police ambush, killing Mr. Brown and seriously injuring Mr. Orange, the criminals return to their rendezvous point (a warehouse), and realize that one of them had to have been a police informant. But who?

6. Carlito's Way

Carlito has just gotten out of prison due to technicalities with the help of his sleazy lawyer. After a life spent trafficking heroin he decides not to pursue the life of the streets. He buys into a night club and begins saving money to move to the Bahamas, but his presence as a known player makes it inevitable that he get sucked back into his violent former life.

5. Scarface

An update of the 1932 film, Scarface (1983) follows gangster Tony Montana and his close friend Manny Ray from their trip on the Cuban Boat Lift for refugees to their arrival in Miami. After killing a powerful Cuban figure, Montana and company gain the ability to leave their refugee camps and roam around the U.S. After unsuccessfully trying to make it legitimately in the country, Montana and Ray resort to selling cocaine to dealers around the world. Tony's rise is quick, but as he becomes more powerful, his enemies and his own paranoia begin to plague his empire.

4. Once upon a time in America

Epic, episodic, tale of the lives of a small group of New York City Jewish gangsters spanning over 40 years. Told mostly in flashbacks and flash-forwards, the movie centers on small-time hood David 'Noodles' Aaronson and his lifelong partners in crime; Max, Cockeye and Patsy and their friends from growing up in the rough Jewish neighborhood of New York's Lower East Side in the 1920s, to the last years of Prohibition in the early 1930s, and then to the late 1960s where an elderly Noodles returns to New York after many years in hiding to look into the past.

3. Godfather Part 2

2. Good Fellas

The lowly, blue-collar side of New York's Italian mafia is explored in this crime biopic of wiseguy Henry Hill. As he makes his way from strapping young petty criminal, to big-time thief, to middle-aged cocaine addict and dealer, the film explores in detail the rules and traditions of organized crime. Watching the rise and fall of Hill and his two counterparts, the slick jack-of-all-trades criminal Jimmy Conway and the brutish, intimidating Tommy DeVito, this true story realistically explores the core, blue-collar part of the mob.

1. The Godfather

the Godfather has to be number 1 because it is unparalleled in this genre (and virtually all others). Vito Corleone is the aging don (head) of the Corleone Mafia Family. His youngest son Michael has returned from WWII just in time to see the wedding of Connie Corleone (Michael's sister) to Carlo Rizzi. All of Michael's family is involved with the Mafia, but Michael just wants to live a normal life. Drug dealer Virgil Sollozzo is looking for Mafia Families to offer him protection in exchange for a profit of the drug money. He approaches Don Corleone about it, but, much against the advice of the Don's lawyer Tom Hagen, the Don is morally against the use of drugs, and turns down the offer. This

does not please Sollozzo, who has the Don shot down by some of his hit men. The Don barely survives, which leads his son Michael to begin a violent mob war against Sollozzo and tears the Corleone family apart.

Linux Mint Debian 201109 better than Linux Mint 12 (2012-01-17 00:07)

Linux Mint 12 installer crashed on my laptop (twice). yet Linux Mint Debian 201109 and Linux Mint 11 did not. You get the Linux Kernel 3.0.6 with Linux Mint Debian however.

I officially own PC-BSD 9 Isotope Edition. It brings KDE 4.7.2, Gnome 2.32, LXDE 0.5.7, and XFCE 4.8 on the freebsd 9

kernel. Review soon.

KDE 4.7.2

Castlevania: Aria of Sorrow (2003 Video Game)

9.0/10

Director: Junichi Murakami

Stars: Hikaru Midorikawa, Hiroko Takahashi, Osamu Ryutani, Tetsu Inada

Gnutella stands nearly alone (2012-01-19 01:59)

The CIA are shutting down Rapidshare, Megaupload and others.

At least the Gnutella protocol still exists, protected by the GPL license. Gnutella doesn't have a stable connection, but is better than torrents. Thank god for Gnutella!

PC-BSD 9.0 Impressions (2012-01-23 19:50)

I finally installed PC-BSD 9.0. For some reason I had to install Libreoffice with FreeBSD ports in install mode. This PC-BSD is very, very stable like PC-BSD 8.2 was. Remember, Linux Mint goes into coma for 10 seconds. I booted 15 times and nothing really showed up. The openSUSE 12.1 had a GRUB file which I added PC-BSD 9 script to the file. KDE 4.7.3 is pretty fast for 32-bit. I ordered a 64-bit DVD so PC-BSD 9 can use five more cores. The NTFS drivers were great this time around, because it mounted.

FreeBSD is ultra-powerful, ultra-secure and ultra-stable (more so than Mac OS 10.6!) yet unknown. It won't win any OS politics anytime soon. I heard MAC OS 10.6 is based on old FreeBSD 5.4! The USG should take notice.

<ftp://ftp.pcbsd.org/pub/pbioutgoing/i386/9/editors/libreoffice/>

I downloaded GAG to dual-boot PC-BSD 9 since PC-BSD 8.2 came with a loader. I didn't need GPT partition either.

X

IFRAME: <http://www.archive.org/embed/Pc-bsd9.0>

It's like a 10/10.

perlpetual (2012-01-26 06:25:05)

Hi,

I too am planning to install PC BSD. Have had enough issues with Windows and Linux now a days seems really bloated. One update fixes one thing and crashes something else.

Tried FreeBSD 9 and it works fine. Now will try PC BSD. :)

In Perth, Australia for 1 week! (2012-01-29 00:06)

X

Cottesloe Beach

greenmount national park

X

I saved 2 years worth of cash to go to Perth, Australia for 1 week. I was looking for tropical places to vacation. Florida would've been a safest, yet I been there in July, 1999 for a Caribbean cruise. I said I was taking pictures of the scenery and wasn't getting into anyone's beeswax. I wore my Green Bay Packer cap everywhere, because I do that anyway. My cousin from U.S. Fleet Activities Yokosuka had Australia as favorite place he visited so I took his word for it.

14.2 February

Favorite movies (2012-02-01 16:04)

I joined IMDB to make a list easily.

serial killer who skins his victims. (118 mins.)

Director: Jonathan Demme

Stars: Jodie Foster, Anthony Hopkins, Scott Glenn, Ted Levine

No Exotic subtropical paradise! (2012-02-02 00:56)

Nothing near tropical photos. This is where I am from. Some of these are from Milwaukee, Wisconsin, a miniature wall-street. I would much rather be in some subtropical climate, but at least there are no hurricanes, no tornadoes where I live. If Wisconsin was so great, why are most of the geezers envying the "The Villages" (Florida)?

The Best Buy rep is absolutely right (2012-02-02 14:57)

I go up to a Best Buy rep a few days ago, and I ask him if he wants to comment on the Youtube vids I've made. He told me that Youtube is a giant business and you pay Youtube-views \$40 for 10,000 to get started and there is absolutely no other way.

I'll have to do this soon

<http://www.youtube-views.com/>

Had this one since 1997

Played Wipeout 2048 (2012-02-04 01:28)

The thumb pad feels like a D pad. There is absolutely no give just like the PSP1000.

In 2005, Wipeout Pure was my first game and I was playing it for 7 days. I'll probably buy Lumines Electronic Symphony, Uncharted Abyss, and Wipeout 2048.

I bought Lumines, Wipeout Pure and 'Ridge Racer' in 2005.

The 27th birthday paid for it. The main con is no removable battery pack screw-wise. This generation is just about over, moving forward.

The playlist for Wipeout 2048 is lacking

Anile – Change Of Direction (WipEout mix)
Camo+Krooked – Breezeblock (WipEout mix)
Deadmau5 – Some Chords (WipEout edit)
DirtyLoud – School Of Funk
DJ Fresh ft. Sian Evans – Louder (Drum Sound & Baseline Smith Mix)

Future Sound Of London – We Have Explosive (2011 rebuild) WipEout edit Kraftwerk – Tour De France 2003 (WipEout edit)
Noisia – Regurgitate (WipEout 2048 Edit)
Orbital – P.E.T.R.O.L (Final Drop Mix)
Orbital – Beelzedub
Rockwell – BTKRSH (WipEout edit)
The Chemical Brothers – Electronic Battle Weapon 3
The Prodigy – Invaders Must Die (Liam H re-amped mix)

Underworld – Kittens (Will Saul & Tam Cooper Remix)

Deadmau is lacking in talent. I only recognize Underworld and The Chemical Brothers from previous games. There still is no Armin Van Buuren, Dash Berlin, Daft Punk, sasha, Ferry Corsten, BT, or Markus Schultz.

Lumines Electronic Symphony has a better and longer playlist

4 AM" – Kaskade

"Aganju" – Bebel Gilberto

"Always Loved A Film" – Underworld "Apollo Throwdown" – The Go! Team

"Automatons" – Anything Box

"Autumn Love" – SCSI-9

"Bang Bang Bang" – Mark Ronson & The Business

"Celebrate Our Love" – Howard Jones

"Close (To The Edit)" – Art of Noise

"Disco Infiltrator" – LCD Soundsystem

"Dissolve" – The Chemical Brothers

"Embracing The Future" – B.T. "Flyin' Hi" – Faithless

"Good Girl" – Benny Benassi

"Gouryella" – Gouryella "Hey Boy Hey Girl" – The Chemical Brothers

"Higher State of Consciousness" – Wink

"In My Arms" – Mylo

"Kelly Watch The Stars" – Air

"Moistly" – LFO

"Never" – Orbital*

"Out Of The Blue" – System F "Pacific 707" – 808 State

"Played-A-Live (The Bongo Song)" – Safri Duo

"Rocket (Tiesto Remix)" – Goldfrapp "Sunriser (Publicmind Remix)" – Ken Ishii

"Superstar" – Aeroplane

"The Future of the Future (Stay Gold)" – Deep Dish

"The Sun Rising" – The Beloved

"What's Your Number" – Ian Pooley

"Windowlicker" – Aphex Twin "Wolfgang's 5th Symphony" – Wolfgang Gartner

"Wooden Toy" – Amon Tobin

"Yesterday When I Was Mad (Jam & Spoon Mix)" – Pet Shop Boys

At least Lumines had Ferry Corsten and BT in it.

I believe if I buy either game.

Vita needs some Square-Enix RPGs for it for certain.

videogames prices to drop (2012-02-07 17:56)

Lets just say that \$20 should be the price of all games today. Maybe in the future, it'll be that way games bought new. For PS1 games, we paid \$49.99 for back in '95 would cost us \$72.57 in 2012. \$41.91 in 1995 money is \$60 dollars today. Mario 64 costing \$80 at one point in 1996. It wasn't unusual to buy \$75 for SNES, N64 and Sega Genesis games which is \$120 in today's money. In Asia and South America, there are a lot of pirated Xbox 360 games for \$5.

Dr. Peter Molyneux / Lionhead Studios Wii U theory (2012-02-08 04:04)

"Nintendo's slightly lack lustre Wii U is going to have to blow us away with better specs and great 1st party line up."
 "The real challenge is how the players are going to adapt to the mounting pressure of Facebook, Apple, Social, Cloud, Multi-Gaming." The Wii U specs are lack-luster DirectX 10.1-like Radeon R770 GPUs. Lionhead Studios develops Fable 5 for Xbox 720. This is similar to what GearBox Software (Halo, Borderlands) also said earilier this year. Pete helped develop videogames such as Populous, Dungeon Keeper, Black & White, and Black & White 2. Molyneux was given the tenth position in "Top Ten Game Creators" Countdown by GameTrailers website. Molyneux was inducted into the AIAS Hall of Fame in 2004. He was awarded the Lifetime Achievement Award by the Game Developers Choice Awards.

I believe if I buy either game. Vita needs some Square-Enix RPGs for it for certain.

What if GP2X Caanoo ran Android? (2012-02-16 12:58)

The JXD S7100 was made with Android games in mind just like the Caanoo which runs the 2.6.24 kernel. They both run console emulators except the JXD S7100 can also emulate the Nintendo 64. How important is it to play Ocarina of Time, Goldeneye 007, Perfect Dark, Super Mario 64, Paper Mario, Majora's Mask for free? I can play N64 on an emulator on Vita someday with an exploit. Why would I care? Modders got Sega Genesis to emulate on the Japanese Vita model already.

It's costs \$60 more than GP2x Caanoo.

dual-core Cortex A-9 processor
Mali 400 graphics core
12MB of RAM and 16GB of internal storage
and Wi-Fi connectivity
512 MB of RAM

X

IFRAME: http://www.youtube.com/embed/dK2ZsBP_UB0?fs=1

I'm buying Playstation Vita next week. Better games. I read Lumines Electronic Symphony and Rayman Origins got 9.0 overall at IGN.com, while Uncharted Golden Abyss and Wipeout 2048 got 7.5 from the same site.

What if GP2X Caanoo ran Android? II: YINLIPS YDPG18 (2012-02-17 10:23)

PBIs are easy (2012-02-18 18:43)

My PC-BSD didn't Libreoffice 3.4.5 (only openoffice 3.2) so the PBI file is automatic like exe file. Can you believe that Firefox 10 is 200 MB? I also got Opera 11.61, Q4Wine and Wine 1.3.4, some console emulators.

I got the 64-bit PC-BSD 9 Isotope Edition so I installed that today.

None of my facebook acquaintances want to join Google+. I'm on Google+. Like I said, facebook is evil. I comment on this college employee's wall, but he doesn't return the favour. Nobody returns the favour (all Americans).

There are a lot of people, who I comment on thier wall, and they unfriend me. Then they act like they haven't seen me in their life. What the fuck? Then they hit the abuse button, It just shows how hell-ish facebook is.

Bought Star Trek Voyager complete series (2012-02-19 15:35)

I was a fan of the Star Trek Voyager in 1995 - 2001 and I have many episodes in Xvid off Limewire long time ago. Thanks to a Canadian, I have all seven seasons. This was fascinating for me as a kid, all this 24th century technology. Star Trek with James T. Kirk seemed so outdated culturally. Hollywood is talking about a post-Voyager series. I got this set \$80 cheaper by waiting over the brand new Amazon price. I'm a little bit interested in the next Star Trek series whatever that may be? In case you're wondering, I already have Star Trek The Next generation complete box set from 2009. I imagine this new series will incorporate technologies like Quantum slipstream drive. It will take place after 2381 when Starfleet upgraded slip stream drives. The new series should have Vesta-class starships in it. The relaunch of Star Trek Voyager by Kirsten Beyer seem to be better series than Titan, Next Generation, Destiny, and Typhoon Pact series.

✕

Here's my favorite Star Trek Next Generation episodes.

1. "The Best of Both Worlds"
2. "The Best of Both Worlds, Part II"
3. "Yesterday's Enterprise"
4. "The Inner Light"
5. "Relics"

Top 10 Voyager episodes

- 1.

Timeless

This episode starts with Chakotay and Harry Kim finding the frozen remains of Voyager and her crew on an ice planet ten years after their less than triumphant return to the alpha quadrant. This one is awesome because it forces such speculation from the viewer as to how the disaster occurred, and you just can't beat a cameo by LeVar Burton as Captain Geordi LaForge of the Starship Challenger.

2.

Blink of an Eye

In this one, Voyager comes across a planet whose relationship with space-time makes time on the surface pass faster than the rest of the universe. While days pass on voyager, centuries pass on the planet. Voyager becomes trapped in orbit, which causes geological problems on the surface. My favorite part of this episode is how the due to the constant presence of Voyager in the sky, it takes a place in the alien society similar to that of the moon in ours... inspiring operas and a space race as they become more advanced.

3. Year of hell part 1 &2

Voyager encounters a race with a weapon that allows them to erase anyone or anything from history, altering the timeline in their favor. Voyager promptly gets beat to hell by the alien race and over a year, Janeway builds alliances to stop them and restore the timeline to normal. A great episode for those that enjoy bits about how time travel and changing time lines work in the Star Trek universe.

4. Equinox part 1 &2

ver since Voyager Premiered, much of the Fanfic had revolved around the concept of Janeway encountering another

Starfleet vessel in the Delta Quadrant. At the end of season five, fans got their wish when the Voyager received a hail from the Starship Equinox. The captain of the Equinox has made much darker decisions than Janeway had to to keep his crew alive, and is determined to get them back home at all costs. When Janeway discovers how far he's strayed from federation ideals, she vows to bring him to justice.

5. Hope and Fear

When Paris and Neelix return from an away mission with the mysterious Arturis, who helps them decipher a coded message from Starfleet that seemingly offers the crew a way home via an experimental ship called the Dauntless. It turns out to be a trap, as Arturis blames Janeway for not allowing species 8472 to stop the Borg before they could assimilate his world. It's one of the few where Janeway is forced to confront that her actions can have a down side for those in the Delta quadrant, and one where Seven of Nine admits that she may not want to continue her quest for individuality. A lot of focus is placed on the Seven/Janeway relationship.

Playstation Vita review (2012-02-20 10:38)

Playstation Vita review

Posted on February 18, 2012

I was fortunate enough to get my hands on a Vita and spend a good deal of time playing two games that I was looking forward to – Lumines Electronic Symphony and Wipeout 2048 and two others.

I won't waste time regurgitating the stats on the device – you can see for yourself on the Vita page on Amazon and chances are if you are interested in the device then you are a motivated buyer who did some kind of research ahead of time. So here is my (somewhat) abridged impressions:

1. Initially I was concerned about the size of the Vita. Some early reports said it was bulky and felt cheap. While I can't dispute that the shell is made of mostly hard plastic, it still felt pretty good. The weight of the device felt balanced, and while the Vita is "big" to the eye, it is not heavy to the touch and has a nice sleek look to it. The design is also more comfortable thanks to the rounded edges and redesigned appearance.

2. The resolution of the screen is nice. Images were vivid. Pictures were clear. The front touchscreen works extremely well and all in all I was impressed at Sony's (albeit late) foray in to the world of touch handheld gaming devices. However, upon playing the games, I can say with 100 % certainty that the games definitely look fantastic – but they are NOT PS3 quality. I'm sure many of you already know that, but I just want to inform those who are expecting to play their PS3 on a handheld system. For me it was more like PS 2.5 graphics – much better than the PS2, but not quite PS3.

3. The browsing speed of the 3G version was okay. I wasn't extremely blown away. I experimented with surfing various sites and found the download speed to be inconsistent. Some pages loaded extremely fast, others were slow. But keep in mind this is on a 3G connection so it is an issue that can affect other devices as well. Nonetheless, I did enjoy surfing on the device thanks to the big screen.

4. The buttons were easy to use, though the D pad and the buttons feel somewhat small and might be a bit tricky to use for people with fat fingers. The dual analog sticks feel comfortable and easy to use. They are a bit small and you can't click on them, but trust me, it's great to have two sticks on the device. It just makes playing games feel much more natural and gives the Vita a nice console-feel to it.

5. The picture quality of the camera is okay, but not better than what I take on my iPhone 4S. However, I do like the fact there are dual cameras. My only gripe about the front camera is that it is located very close to the buttons and it is easy to smudge that area of the Vita given its location on the device.

6. Video quality is decent. I really enjoyed watching some music videos on the big Vita screen. However, while the clarity of the videos is nothing to sneeze at, it doesn't blow what I see iPhone 4S out of the water. Nonetheless it is more than fine for most people and again, I really like the big screen. Just note that the Vita does not support HTML 5 video (it does support parts of HTML 5, but just not the video component of it) or flash. Hopefully that will change down the road.

7. The UI is very easy to navigate. It is easy to launch games, apps and manage your settings on the touch screen. I was very pleased with this aspect of the Vita as well.

Quick Game Impressions:

Uncharted – Definitely the sharpest looking game that I tried. The graphics are solid and they are impressive the second you turn on the game. It may not blow away what you see on the PS3, but it is definitely the game that you show off to your friends when you carry your shiny new Vita around. The gameplay is smooth, and I like how

it incorporates touch actions (like taps and wipes) to in-game combat and movement. Definitely a must-get launch game.

Wipeout 2048 – If you played Wipeout before, then there isn't a lot here that you won't be familiar with. It's a high speed racing game with sexy graphics. But honestly after playing for 15 minutes, I got kind of bored. It's pretty, but it's nothing I haven't experienced before. The load times were also a bit long. I wouldn't consider this a MUST get.

Little Deviants (included with the First Edition Bundle) – A surprisingly fun game that makes (great) use of the rear touchpad. It might feel funny at first, but after you get used to the (excellent) rear touchpad, you'll be addicted to this platformer's string of fun minigames. I had way more fun playing this than Wipeout (to my surprise).

ModNation Racers – Essentially a PS clone of Mario Kart, with lots of colorful graphics and the ability for you to modify your racer/cars etc. Initially I was impressed with the customization options, but once I actually got to the race, I found the game to be too similar to Mario Kart but without the charm. The gameplay itself was alright and the car I tried out controlled okay, but overall the graphics also didn't blow me away.

If you do buy a Vita, I would recommend Uncharted and Little Deviants as good first round buys. I can say this, I definitely had more fun with these games than any of the 3DS launch games (no dig at Nintendo as I do think the 3DS has some fine games as well, but Sony seems to have at least done a better job at launch time here in the U.S.)

Now to the But ... in my title. My only main gripe with the Vita (so far) is the expensive cost of the memory cards. It is annoying that you can't buy anything other than Sony's Vita-only memory and paying \$100 for a 32GB card does seem very excessive. You also have to get used to gripping the Vita in a different way to utilize the rear touch screen, but again, that's more about learning something new than anything else. The pricetag is also somewhat hefty, but to me it's worthwhile if you are into games, which leads me to ...

All in all – if you are a hardcore gamer, you'll love this toy. It's not a PS3 in your hand, but it comes pretty darn close. Even though it has tablet-wannabe ambitions at times, in the end the Vita is a solid handheld gaming system for people who CARE about and LOVE games – plain and simple.

Keystone XL leaks, yet is worth building (2012-02-25 13:12)

Canada is rapidly increasing its oil production, and if the U.S. foolishly refuses to be a customer for these new supplies, Canada will build a pipeline to the Pacific coast and the oil will be exported to China and other overseas buyers. See it's worth it despite all the leaks. Keystone XL would transport tar-sands oil 1,700 miles across six states and hundreds of water bodies

BSD vs. Linux : Project to figure truth (2012-02-27 04:21)

"We started with a hypothesis that FreeBSD has better performance than Linux. Our experiments show that even though Linux outperforms FreeBSD in the measurement of kernel call latency, it is FreeBSD that performs better overall. " Dr. Marty Humphrey

PS4 went x64 (2012-03-01 05:41)

Sony was developing a lot of videogames on PC so the publisher thought to add an AMD x64 CPU and a Radeon HD 7850, 2 GB of GDDR5 to their PS4. Sony wants you to be able to use Bluray on Playstation 4, otherwise Bluray would be replaced soon. I don't know of any Bluray competitors or successors.
 Microsoft is working on a 6 core ARM CPU and Radeon HD 7850 for Xbox Loop.
 This is great news, because I dislike paying \$60 for DirectX 9.0c. PS3 and Xbox 360 should sell new games at \$40 considering their DirectX 9.0c quality. 3DS has it at this price point.
 I happen to look at System16.com and noticed Namco, Capcom Taito, and SEGA all went to Intel X64 motherboards!
 The MAME cabinet is replacing all arcade cabinets out there. Advance MAME Linux DVD.

Owning Panzer Dragoon Saga since today (2012-03-04 12:36)

I remember an article in 2005 Game Informer issue where Panzer Dragoon Saga is the most desired collector's game, because nobody played it. I owned Panzer Dragoon, Panzer Dragoon II Zwei, and Panzer Dragoon Orta for six years. I

bought Panzer Dragoon at Funcholand in November 2000 and was reading all the Saturn reviews at Dave's Sega Saturn Page. In 2000, I wanted to play Nights into Dreams and Sonic 3D Blast; whereby, I would have all the mainstream consoles in 32-bit age.

I also got to play Radiant Silvergun and DoDonPachi in SSF from a Megaupload download.

In January 2007, I torrented it and I played the first three CDs in SSF emulator on Windows. Today, I bought a copy for \$167 off Amazon. On Ebay, Panzer Dragoon Saga was only \$300+. I got Valkyrie Profile on PSP, the Playstation equivalent in price. Another Saturn game I've been eyeing is Guardian Heroes, a sequel to a highly rated Gunstar Heroes. Guardian Heroes is on Xbox 360 arcade, and got a 8.5 out of 10.

✕

Panzer Dragoon Saga never went down in price as people got tired of it. I was hoping it is somewhat of a collector's item for attention on Youtube. Panzer Dragoon Saga is a milestone to get over 200 views on Youtube. Guardian Heroes would also attract attention, not as much as Panzer Dragoon Saga.

I'll post a photo when it arrives.

Pretty good Tetris (2012-03-05 16:44)

http://www.freewarefiles.com/TetriCrisis-4-100Percent_program_73299.html
